asked by a wide range of disciplines including semiotics psychoanalysis anthropology neuropsychology and in general contemporary critical analysis of the visual arts In *A Transformational Theory of Aesthetics* Michael Stephan breaks new ground by linking the findings of these areas Drawing on their common area of knowledge he has developed a radically new theory of picture perception and aesthetic response arguing that images can generate in us a complex pattern of mental changes or transformations This is because the left and right hemispheres of the brain do not always work in harmony hence the wide ranging nature of aesthetic response to distinct art forms *A Transformational Theory of Aesthetics* is essential reading to those seriously involved in linking the arts and cognitive sciences
