

III. Science and Faith

A. Darwinism and Its Critics

1. Theory

- *On the Origin of Species* (1859)
- Darwin argued that all creatures struggle to survive but some are born with mutations that make them better fit for their environment (“natural selection”)
- these characteristics then become dominant in future generations.

Darwinism Its Critics:

Intelligent Design Creationism and Its Critics Robert T. Pennock, 2001-12-21 The last decade saw the arrival of a new player in the creation evolution debate the intelligent design creationism IDC movement whose strategy is to act as the wedge to overturn Darwinism and scientific naturalism This anthology of writings by prominent creationists and their critics focuses on what is novel about the new movement It serves as a companion to Robert Pennock s Tower of Babel in which he criticizes the wedge movement as well as other new varieties of creationism The book contains articles previously published in specialized hard to find journals as well as new contributions Each section contains introductory background information articles by influential creationists and their critics and in some cases responses by the creationists The discussions cover IDC as a political movement IDC s philosophical attack on evolution the theological debate over the apparent conflict between evolution and the Bible IDC s scientific claims and philosopher Alvin Plantinga s critique of naturalism and evolution The book concludes with Pennock s Why Creationism Should Not Be Taught in the Public Schools

Darwinian Heresies Abigail Lustig, Robert J. Richards, Michael Ruse, 2004-08-30 In *Darwinian Heresies* which was originally published in 2004 prominent historians and philosophers of science trace the history of evolutionary thought and challenge many of the assumptions that have built up over the years Covering a wide range of issues starting in the eighteenth century *Darwinian Heresies* brings us through the time of Charles Darwin and the Origin and then through the twentieth century to the present It is suggested that Darwin s true roots lie in Germany not his native England that Russian evolutionism is more significant than many are prepared to allow and that the true influence on twentieth century evolution biology was not Charles Darwin at all but his often despised contemporary Herbert Spencer The collection was intended to interest to excite to infuriate and to stimulate further work

Evolutionism and Its Critics Stephen K. Sanderson, 2015-12-03 *Evolutionism and Its Critics* is a critical history of evolutionary theories in the social sciences and a defense of them against their many critics Sanderson deconstructs not only the wide array of social evolutionary theories but the criticisms of the antievolutionists Deconstructing evolutionary theories means laying bare their fundamental epistemological methodological conceptual and theoretical assumptions and principles Deconstructing antievolutionism means showing just where and how the critics have for the most part gone wrong But *Evolutionism and Its Critics* aims to reconstruct as well as deconstruct and does this by building on the shoulders of past giants of evolutionary theorizing a comprehensive evolutionary interpretation of human society based on abundant scientific and historical evidence

A Criticism of Darwinism Otto Everts, 1894

Thinking Beyond Darwin Ernst Michael Kranich, 1999 Through the work of Charles Darwin a great task was set before science to progress from opinions about evolution to a science of evolution and reveal the inner laws and driving forces at work in the development of the organic world In *Thinking beyond Darwin* Ernst Michael Kranich focuses on a central problem of evolutionary science He shows us a way based on Goethe s botanical and zoological investigations of seeing the coherence and inner dynamics of

organisms Using Goethe s concept of type as a key to vertebrate evolution Kranich methodically lays the foundation for a science of evolution He focuses on the central problem of evolutionary science are there underlying principles that connect the many disparate facts By applying Goethe s method consistently to evolutionary thinking Kranich shows that the laws and driving forces of evolution are encompassed by the inner lawfulness of living organisms and that we must participate through formative thinking in the evolutionary processes Thinking beyond Darwin makes an important contribution to the development of more adequate concepts of evolution and arrives at clear insights about earlier animal forms and evolutionary laws that could have immense consequences for future evolutionary thinking
