*A 150 years' celebration of darwin's book on human evolution and sexual selection: Its legacy and future prospects* Marco Antonio Correa Varella, Jaroslava Varella Valentova, Catherine Salmon, Barnaby James Wyld Dixon, Marina Butovskaya, Anabela Pinto Pinto, Boguslaw Pawlowski, Carol Cronin Weisfeld, 2023-07-06

**Essential Evolutionary Psychology** Simon Hampton, 2010-01-20 Essential Evolutionary Psychology introduces students to the core theories approaches and findings that are the necessary foundations for developing an understanding of evolutionary psychology It offers a sound brief and student friendly explication of how evolutionary theory has been and is applied in psychology The book unpicks the very essence of human evolution and how this knowledge is used to give evolutionary accounts of four of the central pillars of human behavior cooperation attraction aggression and family formation It also covers evolutionary accounts of abnormal behavior language and culture

**Evolutionary Psychology** David Buss, 2015-10-02 This book examines human psychology and behavior through the lens of modern evolutionary psychology Evolutionary Psychology The New Science of the Mind 5 e provides students with the conceptual tools of evolutionary psychology and applies them to empirical research on the human mind Content topics are logically arrayed starting with challenges of survival mating parenting and kinship and then progressing to challenges of group living including cooperation aggression sexual conflict and status prestige and social hierarchies Students gain a deep understanding of applying evolutionary psychology to their own lives and all the people they interact with

**Babies—Darwin's Survivors as the Fittest** Louis Carini, 2011-06-24 Darwin overlooked the fact that we had to originate as babies in his *On the Origin of Species by Means of Natural Selection* 1859 Surely we all know that babies are in no condition to survive on their own Babies are not fitted to survive in any Struggle for Existence That means that we Homo sapiens had to have originated as the first human babies of our hominid parents I propose that we originated on the basis of my new theory of evolution in Lectures VI and VII above Those hominids loved us and cared for us and that is how human babies survived But there has never been a theory of our origins Or at least there had been none until my *The Origins of Homo Sapiens* Xlibris 2008 In Lecture VI I newly present my theory of evolution and in Lecture VII a theory of our special human origins I write origins because there must have been many small groups of hominid survivors of my proposed holocaust whose young women then gave birth to those first Homo sapiens babies How all of this took place is the subject of those two lectures If you wish you may go directly to them for each lecture stands on its own Louis Carini received his doctorate in Experimental Psychology from Clark University in 1955 He is the author of *The Theory of Symbolic Transformations Three Axioms for a Theory of Conduct Spiritual Humanism and The Origins of Homo Sapiens* [Ebook: The Science of Psychology: An Appreciative View](#) King, 2016-09-16 *Ebook The Science of Psychology An Appreciative View* *Human Evolutionary Psychology* Louise Barrett, Robin Dunbar, John Lycett, 2002-02-17 Why do people resort to plastic surgery to look young Why are stepchildren at greatest risk of fatal abuse Why do we prefer gossip to

algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology

**Baby Meets World** Nicholas Day, 2013-04-02 A dynamic new story about how babies make their way in the world and how grown ups have tried to make sense of these tiny inscrutable beings As a new parent Nicholas Day had some basic but confounding questions Why does my son find the straitjacket of his swaddling blanket comforting and not terrifying How can he never meet a developmental norm and still be OK And when will he stop sucking my finger So he went digging for answers They were not what he expected Drawing on a wealth of perspectives scientific historical cross cultural personal Baby Meets World is organized around the mundane activities that dominate the life of an infant sucking smiling touching toddling From these everyday activities Day weaves together an account that is anything but ordinary a fresh surprising story both weird and wondrous about our first experience of the world Part hidden history of parenthood part secret lives of babies Baby Meets World steps back from the moment to moment chaos of babydom It allows readers to see infancy anew in all its strangeness and splendor
