Political Discourse in the Media Anita Fetzer, Gerda Eva Lauerbach, 2007-06-27 This book departs from the premise that political discourse is intrinsically connected with media discourse as shaped by its cultural and transcultural characteristics. It presents a collection of papers which examine political discourse in the media from a cross-culturally comparative perspective in Arab, Dutch, British, Finnish, Flemish, French, German, Israeli, Swedish, US, American, and international contexts. By using different theoretical frameworks such as conversation analysis, discourse analysis, pragmatics, and systemic functional linguistics, the papers reflect current moves in political discourse analysis to cross-disciplinary and methodological boundaries by integrating semiotics, particularly multimodality, cognition, context, genre, and recipient design. **The American Review of Reviews** Albert Shaw, 1915 **The International Economy** Peter B. Kenen, 2000-01-13 This text is a rigorous introduction to international economics for upper-level undergraduates and above. The first half examines the causes and effects of international trade, how tariffs and other trade policies affect the gains from trade, and the ways in which governments try collectively to regulate those policies. The second half deals with monetary matters, the behavior of exchange rates, how trade and capital flows affect the functioning of monetary and fiscal policies, the causes and management of currency crises, and the new European Monetary Union (EMU). This fourth edition assesses the outcome of the Uruguay Round of trade negotiations, the work of the new World Trade Organization (WTO), and the challenges posed by regional trade blocs. It surveys recent theoretical work on currency crisis, examines recent crises in emerging market countries, and the role of the International Monetary Fund (IMF) and appraises innovations in exchange rate arrangements, including the EMU and the use of currency boards by emerging market countries. A problem set follows each chapter. **Political Communications** D. Wring, J. Green, R. Mortimore, S. Atkinson, 2007-05-01 This offers a unique insight into the 2005 British General Election from the perspectives of those responsible for organizing, reporting, and understanding the campaign. It contains definitive accounts of what happened from those most intimately involved in preparing the main party strategies, as well as leading academic media and polling experts. *The Woman in the Little House* Leonora Eyles, 1922 *British Ruling Cases from Courts of Great Britain, Canada, Ireland, Australia and Other Divisions of the British Empire, Extensively Annotated*, 1919 This series of reports is in a sense a continuation but with a decided expansion of the plan of the English ruling cases as it takes the cases from the British Empire instead of from England only, but it continues the English ruling cases in the sense that it will include the most important cases from the English courts decided since that series terminated. Pref. **The British Prime Minister** Anthony King, Anthony Stephen King, 1985 The British prime minister is universally acknowledged to be the most powerful single individual in the British system of government, but very little is known about what goes on behind the closed door at 10 Downing Street. As Anthony King points out, there are few articles, let alone books, on the prime ministership available to students of British politics, either in the UK or the US. As the preface to the American edition states:

while the British prime minister and the American president do resemble each other in some ways it is important right at the start to recognize the profound differences between them
