Recent decades have witnessed an explosion of museum building around the world and the subsequent publication of multiple texts dedicated to the subject Museum Architecture A new biography focuses on the stories we tell of museum buildings in order to explore the nature of museum architecture and the problems of architectural history when applied to the museum and gallery Starting from a discussion of the key issues in contemporary museum design the book explores the role of architectural history in the prioritisation of specific stories of museum building and museum architects and the exclusion of other actors from the history of museum making These omissions have contemporary relevance and impact

directly on the ways in which the physical structures of museums are shaped Theoretically the book places a particular emphasis on the work of Pierre Bourdieu and Henri Lefebvre in order to establish an understanding of buildings as social relations the outcome of complex human interactions and relationships The book utilises a micro history an in depth case study of the National Gallery of the North the Walker Art Gallery in Liverpool to expose the myriad ways in which museum architecture is made Coupled with this detailed exploration is an emphasis on contemporary museum design which utilises the understanding of the social realities of museum making to explore ideas for a socially sustainable museum architecture fit for the twenty first century

A History of Artificially Intelligent Architecture Danyal Ahmed, 2023-10-23 A History of Artificially Intelligent Architecture Case Studies from the USA UK Europe and Japan 1949 1987 provides a comprehensive survey of architectural projects exhibiting intelligence since the Late First Century right up to the present day Tracing the social scientific and technological developments this book analyses case studies from both conceived and executed architectural projects by Architects and Cyberneticians from the United States United Kingdom Europe and Japan from 1949 87 From the Late First Century through to the Seventeenth Century the scientific endeavors of the Hero of Alexandria Ramon Llull Paracelsus Ren Descartes Jacques de Vaucanson Pierre Jacquet Droz and Charles Babbage have been presented in which they attempted to review analyse and conclude the notion of artificial intelligence Coming to the Twenty First Century and witnessing a period particularly from 1949 87 where nothing had been constant Architects and Cyberneticians whose architectural projects attempted to simulate intelligence include Cedric Price Richard Saul Wurman Nicholas Negroponte Kenzo Tange Arata Isozaki Charles Eames Ezra D Ehrenkrantz Richard Rogers Renzo Piano and Gordon Pask respectively This book asks How have Polymaths Architects and Cyberneticians simulated artificial intelligence in their scientific architectural projects Is it possible to define intelligence purely based on the history of architecture Or on a more extensive level is it possible to view artificial intelligence originating from the history of architecture instead of computational paradigm The transdisciplinarity of the book makes it of interest to researchers and students of technologically advanced architecture s history theory and criticism artificial intelligence cybernetics information and communications urban and sustainable design ergonomics computer applications and digital design and fabrication
