British Tanks and Fighting Vehicles, 1914-1945 Brian Terence White,1970 **British Tank Markings and Names** Brian Terence White,1978 The British Way of War in Northwest Europe, 1944-5 L. P. Devine,2015-12-17 This book examines the experience of two British Infantry Divisions the 43rd Wessex and 53rd Welsh during the Overlord campaign in Northwest Europe To understand the way the British fought during Operation Overlord the book considers the political and military factors between 1918 and 1943 before addressing the major battles and many of the minor engagements and day to day experiences of the campaign Through detailed exploration of unit war diaries and first hand accounts Louis Devine demonstrates how Montgomery s way of war translated to the divisions and their sub units While previous literature has suggested that the British Army fought a cautious war in order to avoid the heavy casualties of the First World War Devine challenges this concept by showing that the Overlord Campaign fought at sub divisional levels was characterised by command pressure to achieve results quickly hasty planning and a reliance on massive artillery and mortar contributions to compensate for deficiencies in anti tank and armoured support By following two British infantry divisions over a continuous period and focusing on soldiers experience to offer a perspective from below as well as challenging the consensus of a cautious British campaign this book provides a much needed re examination of the Overlord campaign which will be of great interest to students and scholars of the Second World War and modern military history in general **Armor**,1972 The magazine of mobile warfare **The Tank Factory** William Suttie,2015-03-02 Despite being the inventor of the tank and responsible for campaign winning tactics by the start of the Second World War the United Kingdom had fallen well behind other nations in the design and build of armoured vehicles Here William Suttie uncovers the history of tank design from a government perspective and the decisions and failures that led to that state of affairs and details the formation of the Fighting Vehicles Research and Development Establishment at Chertsey Known as the Tank Factory the Chertsey establishment sought to ensure that the United Kingdom became world leading in the field of military vehicle research and design and that the British Army would never be underprotected or outgunned again Drawing on unpublished sources and photographs this fascinating book reveals the establishment s history its groundbreaking research and its inventions and designs including first hand insights from those who worked there **Design and Development of Fighting Vehicles** Richard M. Ogorkiewicz,1968 *British tanks and fighting vehicles 1914 - 1915* Brian Terence White,1970 The British National Bibliography Arthur James Wells,1979 *The British Tommy in North-west Europe, 1944-1945* Jean Bouchery,1998
