Facts and Myths Facing Today's World John Durbin Husher,2008 The author provides facts and myths concerning global warming as well as a detailed discussion of DNA and its affects on a person s genetics He brings forth the fantasies

surrounding HIV and AIDS and frees the reader's mind from any fear concerning these afflictions. The reader is introduced to the human genome and stem cells with their promises for the near future. He details how global warming is a normal cycle that our Earth has followed and is not due to atmospheric carbon dioxide. He insists the Earth will have a cooling period near the turn of the century that will cause more concern than the warming cycle we are experiencing. Each of the subjects is presented in a novel manner that the layman will find entertaining.

Global ocean science report UNESCO, IOC, Valdés, Luis, 2017-07-04 The Global Ocean Science Report GOSR assesses for the first time the status and trends in ocean science capacity around the world. The report offers a global record of how where and by whom ocean science is conducted generating knowledge helping to protect ocean health and empowering society to support sustainable ocean management in the framework of the United Nations 2030 Agenda. The GOSR identifies and quantifies the key elements of ocean science at the national regional and global scales including workforce infrastructure and publications. It is the first collective attempt to systematically highlight opportunities as well as capacity gaps to advance international collaboration in ocean science and technology. This report is a resource for policy makers academics and other stakeholders seeking to harness the potential of ocean science to address global challenges. A comprehensive view of ocean science capacities at the national and global levels takes us closer to developing the global ocean science knowledge needed to ensure a healthy sustainable ocean.
