100 Years of Architecture in Chicago Oswald W. Grube, Peter C. Pran, Franz Schulze, 1976 *100 Years of Architecture in Chicago* Oswald W. Grube, Peter C. Pran, Franz Schulze, 1976 **100 Years of Architecture in Chicago** Oswald W. Grube, Peter C. Pran, Franz Schulze, 1973 *Chicago's North Michigan Avenue* John W. Stamper, 1991-08-27 Since its opening in the 1920s Chicago's North Michigan Avenue has been one of the city's most prestigious commercial corridors lined by some of its most architecturally distinctive business residential and hotel buildings Planned by Daniel Burnham in 1909 the avenue became the principal connecting link between downtown and the wealthy residential Gold Coast north of the Loop Some thirty buildings were constructed along its path in the ten year period before the Depression an urban expansion comparable in significance to that of Pennsylvania and Park Avenues John W Stamper traces the complex development of North Michigan Avenue from the 1880s to the 1920s building boom that solidified its character and economic base describing the initiation of the planning process by private interests to its execution aided by the city's powerful condemnation and taxation proceedings He focuses on individual buildings constructed on the avenue including the Renaissance and Gothic inspired Wrigley Building Tribune Tower and Drake Hotel and places them within the context of factors governing their construction property ownership financing zoning laws design theory and advertising Stamper compares this stylistically diverse mixture of low and high rise structures with earlier rejected planning proposals all of which had prescribed a uniformly designed European like avenue of continuous cornice heights consistent facade widths and complementary stylistic features He analyzes the drastically different character the avenue took by 1930 with high rise towers reaching thirty stories and beyond in terms of the clash among economic political and architectural interests His argument that the discrepancies between the rejected plans and reality illustrate the developers choice of economic return on their investment over aesthetic community is extended through to the present avenue and the virtual disregard of the urban qualities proposed at its inception Generously illustrated with an epilogue condensing the avenue's history between the end of World War II and the present this is an exhaustive account of an important topic in the history of modern architecture and city planning *Housing and Planning References*, 1979 **AIA Guide to Chicago** Alice Sinkevitch, Laurie McGovern Petersen, 2004 Completely revised and updated AIA Guide to Chicago Second Edition is the liveliest and most wide ranging guide ever written about Chicago's architecture More than a thousand individual buildings are featured along with more than four hundred photos many taken expressly for this volume and thirty five specially commissioned maps The book is arranged geographically so that the user whether Chicago citizen or visitor can tour each area of the city as conveniently as possible Building descriptions focus on the illuminating but easily overlooked details that give the behind the scenes often unexpected story of why a building took the shape it did And in the best Chicago tradition this guide does not shy away from opinions where opinions are called for Comprehensively researched meticulously written

and more than thorough *Modern in the Middle* Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle Chicago Houses 1929 75* explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region s built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry Dubin 1930 to John Vinci and Lawrence Kenny s gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now [Chicago Architecture and Design](#) George A.
