Frederick Palmer

At War Within:

At War Within William R. Clark, 1997 A look at the immune system and its potential to help and hurt **Going to War in Greece** Frederick Palmer, 1897 The Future of War in Its Technical, Economic, and Political Relations Jan Bloch, 1899 The Art of War in the Middle Ages, A. D. 378-1515 Charles Oman, 1885 **War Within** Ivana Maček, 2000 The Erotics of War in German Romanticism Patricia Anne Simpson, 2006 In The Erotics of War in German Romanticism Patricia Anne Simpson explores the ways early nineteenth century German philosophers poets and artists represent war and erotic desire The author argues that gender is connected to a larger debate about the construction of the self in relation to a community at a time that this definition is under revision She analyzes the culture of war as it shapes the bonds of fraternal familial and eventually national identity Simpson defines the erotics of war as discursive attempts to assert the priority of ethical identity and citizenship over individualized desire The seemingly ancillary problem of female desire emerges not as a marginal issue but as the focal point of a debate about identity **The British Way of War in Northwest Europe, 1944-5** L. P. Devine, 2015-12-17 This book examines the experience of two British Infantry Divisions the 43rd Wessex and 53rd Welsh during the Overlord campaign in Northwest Europe To understand the way the British fought during Operation Overlord the book considers the political and military factors between 1918 and 1943 before addressing the major battles and many of the minor engagements and day to day experiences of the campaign Through detailed exploration of unit war diaries and first hand accounts Louis Devine demonstrates how Montgomery's way of war translated to the divisions and their sub units While previous literature has suggested that the British Army fought a cautious war in order to avoid the heavy casualties of the First World War Devine challenges this concept by showing that the Overlord Campaign fought at sub divisional levels was characterised by command pressure to achieve results quickly hasty planning and a reliance on massive artillery and mortar contributions to compensate for deficiencies in anti tank and armoured support By following two British infantry divisions over a continuous period and focusing on soldiers experience to offer a perspective from below as well as challenging the consensus of a cautious British campaign this book provides a much needed re examination of the Overlord campaign which will be of great interest to students and scholars of the Second World War and modern military history in general **The Nature of War in the Information Age** David J. Lonsdale, 2004 There has been a great deal of speculation recently concerning the likely impact of the Information Age on warfare In this vein much of the Revolution in Military Affairs RMA literature subscribes to the idea that the Information Age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test Using a range of contexts the book sets out to look at whether the classical Clausewitzian theory of the nature of war will retain its validity in this new age The analysis covers the character of the future battlespace the function of command and the much hyped concept of Strategic Information Warfare Finally the book broadens its perspective to examine the nature of Information Power and its implications for geopolitics Through an

assessment of both historical and contemporary case studies including the events following September 11 and the recent war in Iraq the author concludes that although the future will see many changes to the conduct of warfare the nature of war as given theoretical form by Clausewitz will remain essentially unchanged
