The Anatomy of Story John Truby, 2008-10-14 John Truby is one of the most respected and sought after story consultants in the film industry and his students have gone on to pen some of Hollywood's most successful films including *Sleepless in Seattle*, *Scream* and *Shrek*. *The Anatomy of Story* is his long awaited first book and it shares all of his secrets for writing a compelling script. Based on the lessons in his award winning class *Great Screenwriting*, *The Anatomy of Story* draws on a broad range of philosophy and mythology offering fresh techniques and insightful anecdotes alongside Truby's own unique approach for how to build an effective multifaceted narrative. Truby's method for constructing a story is at once insightful and practical, focusing on the hero's moral and emotional growth. As a result, writers will dig deep within and explore their own values and worldviews in order to create an effective story. Writers will come away with an extremely precise set of tools to work with, specific useful techniques to make the audience care about their characters and that make their characters grow in meaningful ways. They will construct a surprising plot that is unique to their particular concept and they will learn how to express a moral vision that can genuinely move an audience. The foundations of story that Truby lays out are so fundamental they are applicable and essential to all writers, from novelists and short story writers to journalists, memoirists and writers of narrative non-fiction.

Horror Films of 2000-2009 John Kenneth Muir, 2023-03-22 Horror films have always reflected their audiences' fears and anxieties. In the United States, the 2000s were a decade full of change in response to the 9/11 terrorist attacks, the contested presidential election of 2000, and the wars in Iraq and Afghanistan. These social and political changes, as well as the influences of Japanese horror and New French extremism, had a profound effect on American horror filmmaking during the 2000s. This filmography covers more than 300 horror films released in America from 2000 through 2009, including such popular forms as found footage, torture porn, and remakes. Each entry covers a single film and includes credits, a synopsis, and a lengthy critical commentary. The appendices include common horror conventions, a performer hall of fame, and memorable ad lines.

Aliens George Edgar Slusser, 1987 How and when does there come to be an anthropology of the alien? This set of essays, written for the eighth J. Lloyd Eaton Conference on Fantasy and Science Fiction, is concerned with the significance of that question. Anthropology is the science that must designate the alien if it is to redefine a place for itself in the universe. According to the Introduction, the idea of the alien is not new. In the Renaissance, Montaigne's purpose in describing an alien encounter was expropriation: man kind was the savage because the artificial devices of nature controlled him. Shakespeare's version of the alien encounter was incorporation: his character of Caliban is brought to the artificial political world of man and incorporated into the body politic. The essays in this volume show, in their general orientation, that the tribe of Shakespeare still in literary studies at least outnumbers that of Montaigne. These essays show the interrelation of the expropriating possibilities to the internal soundings of the alien encounter within the human mind and
