An African Career:

An African Career M. Bettencourt Dias, 2001-08 M Bettencourt Dias grew up in Mozambique He was the first young man from that country to receive a scholarship to an American mining school the Colorado School of Mines where he graduated in mining geology This is the story of his stay in Colorado and of his return to Mozambique where he immediately was sent to deepest Africa Careers in Africa Oluwatimilehin Temitope Ologunoye, Chima Mordi, Olatunji David Adekoya, 2025-04-16 As Africa continues to rise as a global economic and cultural force more scholarly attention must be paid to the diverse and dynamic world of careers and professional development on the African continent This edited volume presents a collection of studies written by some of the most prominent career research scholars in Africa shedding light on the multidimensional and ever evolving landscape of careers across the African continent The book advocates for a greater focus on the institutionalist approach to studying career dynamics in Africa and also offers recommendations and directions for future career studies It motivates future scholars to contribute to cross cultural research on career dynamics by providing an African perspective The narrative explores historical and current practices in career guidance and counselling in Africa by addressing pressing matters such as minimum wage policies equity social justice labour market gender dynamics disability and employment intellectual capital and educational development This book will be of great interest to scholars and students of careers and employment HRM international business and African business more generally as well as practitioners and policymakers working on the continent *The African Repository and Colonial Journal*, 1854 Youth and Employment in Sub-Saharan Africa Hiroyuki Hino, Gustav Ranis, 2014-06-05 It is widely acknowledged that youth unemployment is one of the most critical challenges facing countries in Sub Saharan Africa This volume brings together an eminent group of international scholars to analyse the extent and complex nature of this joblessness and offer a set of evidence based policy choices that could contribute to solving the problem in the short and long run Part I reviews the existing literature on youth unemployment and underemployment in Sub Saharan Africa from microeconomic and macroeconomic perspectives while Part II goes on to present detailed country studies of Ethiopia Ghana Kenya and South Africa These studies offer a deep understanding of the situation on the ground and consider country specific solutions Throughout the book it is argued that the standard ILO definition of unemployment is too narrow to correctly portray employment situations in Sub Saharan Africa Several alternative measures of unemployment are presented which show that joblessness is far more pervasive than commonly assumed in the literature This volume will be of interest to academics and policy makers involved in African development **International Handbook of Career Guidance** James A.
