**An African Classical Age** Christopher Ehret, 1998 In *An African Classical Age* Christopher Ehret brings to light 1 400 years of social and economic transformation across Africa from Uganda and Kenya in the north to Natal and the Cape in the south The book offers a much needed portrait of this region during a crucial period in which basic features of precolonial African societies and cultures emerged Combining the most recent findings of archaeology and historical linguistics the author demonstrates that from 1000 B C through the fourth century A D eastern and southern African history was invigorated by technological change and intricately reshaped by the clash of distinctive cultures Contrary to common presumption he argues Africans of this period were not isolated actors on their own historical stage but direct and indirect participants in the major trends of contemporary world history such as the Iron Age and the first great rise of long distance commercial enterprise In telling their important story Ehret shows how powerful yet delicate a tool language evidence can be in detecting both the details and the long term contours of the past The culmination of twenty five years of research this sweeping historical survey fundamentally challenges how we view the place not only of eastern and southern Africa but of Africa as a whole in the early eras of world history Now available in paperback *An African Classical Age* has become an essential resource for scholars of linguistics archaeology world history and African studies [History and the Testimony of Language](#) Christopher Ehret, 2011 This book is about history and the practical power of language to reveal historical change Christopher Ehret offers a methodological guide to applying language evidence in historical studies He demonstrates how these methods allow us not only to recover the histories of time periods and places poorly served by written documentation but also to enrich our understanding of well documented regions and eras A leading historian as well as historical linguist of Africa Ehret provides in depth examples from the language phyla of Africa arguing that his comprehensive treatment can be applied by linguistically trained historians and historical linguists working with any language and in any area of the world

**A History of African Motherhood** Rhiannon Stephens, 2015-08-06 This history of African motherhood over the longue dur e demonstrates that it was ideologically and practically central to social economic cultural and political life The book explores how people in the North Nyanzan societies of Uganda used an ideology of motherhood to shape their communities More than biology motherhood created essential social and political connections that cut across patrilineal and cultural linguistic divides The importance of motherhood as an ideology and a social institution meant that in chiefdoms and kingdoms queen mothers were powerful officials who legitimated the power of kings This was the case in Buganda the many kingdoms of Busoga and the polities of Bugwere By taking a long term perspective from c 700 to 1900 CE and using an interdisciplinary approach drawing on historical linguistics comparative ethnography and oral traditions and literature as well as archival sources this book shows the durability mutability and complexity of ideologies of motherhood in this region

[The Visual Dynamics of Art, Black Care, and Ethics in South African Art](#) Raél Jero Salley, 2025-02-18 This book interprets

relationships between art and ethics in the context of contemporary South African art Nearly three decades after inaugurating political freedom in a democratic form the infrastructure of South Africa faces palpable issues and challenges to the social fabric The social tension involves painful struggles for decolonization and violent debates about the removal of colonial statues change of colonial names transformation of universities and curriculum change This book does critical work in art history theory criticism and visual culture by looking from and looking after social differences to interpret the potential impact of contemporary media and mediation Artists examined include Zanele Muholi Mohau Modisekeng Dineo Seshee Bopape Hasan and Husain Essop and Kemang Wa Lehulere This book will be of interest to scholars working in art history contemporary art visual culture art theory ethics aesthetics philosophy of art and African studies

**Women's Authority and Society in Early East-Central Africa** Christine Saidi,2010 This study of more than two thousand years of African social history weaves together evidence from historical linguistics archaeology comparative ethnography oral tradition and art history to challenge the assumptions that all African societies were patriarchal and that the status of women in precolonial Africa is beyond the scope of historical research In East Central Africa women played key roles in technological and economic developments during the long precolonial period Female political leaders were as common as male rulers and women especially mothers were central to religious ceremonies and beliefs These conclusions contribute a new and critical element to our understanding of Africa s precolonial history Book Jacket
