The Loss of Aristotelian Logic & the Social, Moral & Sexual Consequences

by PETER KREEFT

WHEN I STARTED teaching logic, in 1962, most of the textbooks taught traditional Aristotelian logic rather than the (then still fairly new) “symbolic logic,” also called “mathematical logic” or “propositional calculus.” Forty years later, there are only two full-length texts of traditional Aristotelian logic in print. One of them is my own recently published logic textbook, *Sacramental Logic* (St. Augustine’s Press), from which much of the middle part of this article is taken. All the other logic texts, over 500 of them, teach symbolic logic, or else informal logic (rhetoric).

By the 1970s, most of the English-speaking philosophical establishment had cast its lot with “analytic philosophy” and the symbolic logic that was its methodological complement. I still vividly remember the reaction of outrage, fear, and loath-

Peter Kreeft is a professor of philosophy at Boston College and at King’s College in New York City. He is a regular contributor to several Christian publications. In wide demand as a speaker, Dr. Kreeft is also the author of over 67 books, including Handbook of Christian Apologetics, Christianity for Modern Pagans, and Fundamentals of the Faith.

ing that came from that establishment when Henry Veatch published his attack on the new logic (*The Two Logics*). The book was a bit verbose, bombastic, and intemperate, but it possessed the three most important (and most rare) qualities any book of philosophy should have: it was interesting, it was rational, and it was right. That’s why the establishment “went postal.” People will forgive you for being wrong, but they will never forgive you for being right.

But this change in logic is not just a technical, in-house issue for philosophers. It concerns everyone, and it has serious social, moral, and even sexual implications, and it is one of the unrecognized indirect causes of “the culture of death,” as I shall try to show in this article.

A PROPHETIC PHONE CALL

I realized this only reluctantly. What first buzzed my inner alarm was a phone call I received about 25 years ago from a man who was quite famous (but not with me: I have forgotten his name). He had written a book attacking the computer revolution. The book had been on the *New York Times* best-seller list for a number of weeks and had elicited high praise. The author had been called “one of the ten most intelligent men in the world.” He thought he had found in me an ally for his cyber-Luddite philosophy because he had read some personal complaint against computers in one of my books. (Yes, I do hate the arrogant little bastards. They are robbers, tricksters, and snobs. “I hate them with perfect hatred, I count them mine enemies.”)

The caller tried to persuade me of this apocalyptic scenario: The use of computers, he claimed, was imperceptibly changing the very structure of human thought into a geometrically increasing left-brain dominance and right-brain atrophy; so that, as we became more and more willing servants of more and more elaborate calculating machines, our acts of ordinary intuitive understanding were becoming rarer and harder. He seemed to me an extremist and a conspiracy theorist, and I mentally labeled him a crank and a crackpot. But he offered me three pieces

Sacred Space for the Missional Church William R. McAlpine, 2011-02-14 Sacred Space for the Missional Church examines the strong link between the theology and mission of the Church and the spaces in which and from which that theology and mission are lived out The author demonstrates that the built environment is not incidental or even subservient to mission Rather it is a key player in the fulfillment and the communication of that mission The book begins with a working definition of the missional church underscoring the connection between God's mission *missio Dei* and the Church's mission The reader is presented with historical and theological frameworks for sacred space and reminded of the pivotal role of the built environment in the fulfillment of the mission of the Church The design and construction of sacred spaces are shown to be fundamentally a theological exercise and not solely a matter of function pragmatics and fiscal astuteness The author questions the uncritical application of blanket statements such as form must follow function and challenges the conviction that it does not matter where worship occurs only that it occurs The book addresses genuine concerns such as legitimizing the cost of church buildings and concludes with practical suggestions and essential questions that must be considered in posturing the built environment within the missional praxis of the Church

When Human Rights Clash at the European Court of Human Rights Stijn Smet, Eva Brems, 2017-07-21 The notion of conflict rests at the heart of the judicial function Judges are routinely asked to resolve disputes and defuse tensions Yet when judges are called upon to adjudicate a purported conflict between human rights they face particular challenges and must address specific questions Some of these concern the very existence of human rights conflicts Can human rights really conflict with one another in terms of mutual incompatibility Or should human rights be interpreted in harmony with one another Other questions concern the resolution of real conflicts To the extent that human rights do conflict how should these conflicts be resolved To what extent is balancing desirable And if it is desirable which understanding of balancing should judges employ This book seeks to provide both theoretical and practical answers to these questions When Human Rights Clash at the European Court of Human Rights Conflict or Harmony debates both the existence and resolution of human rights conflicts in the specific context of the case law of the European Court of Human Rights The contributors put forth principled and pragmatic arguments and propose theoretical as well as practical approaches whilst firmly embedding their proposals in the case law of the European Court Doing so this book provides concrete ways forward in the ongoing debate on conflicts of rights at Europe's human rights court

The Unknown God Thomas G. Grenham, 2005 This book explores the idea of religious and theological interculturalism from a Christian perspective as an approach to evangelisation It explores aspects of culture and pluralism as these have been interpreted in post Vatican II approaches to mission and evaluates interculturalism from a number of perspectives including language symbol and metaphor It draws insight from two New Testament encounters of Jesus with women in Samaria John and in Tyre Matthew and Mark and goes on to explore some historical sources of interculturalism in

unedited continuous chronological flow of the mind's conscious experience. The author regards these pieces as edited interior dialogues for a monologue would not produce such varying perspectives. But stream these poems do as do thoughts, actions, memories. The reader will note that many describe the lives of rivulets, streams, and rivers and how they affect the poet before they eventually empty into the sea, which may be viewed as the vast ocean of human experience, i.e. life. The ocean represents life since life began there. The poet views hope as in her poem *Aspiration* as a chance to win the best things in life, idealism just as early man hoped to learn how to clothe himself by making boots for cold weather in *Footwear*. A History In Dubious Battle farm workers hope for justice in terms of respect and fair wages. Pen and I conveys hope by artistic creation. Other themes include intimacy, education, childhood, sensitivity, frustration, governmental and social injustice, nature, family relationships, social protest. Not all her poems treat only what their titles suggest; each poem contains some surprise content.
