## Among Wolves:

**Among Wolves** Marybeth Holleman, Gordon Haber, 2013-10-15 Alaska's wolves lost their fiercest advocate Gordon Haber when his research plane crashed in Denali National Park in 2009. Passionate, tenacious, and occasionally brash, Haber, a former hockey player and park ranger, devoted his life to Denali's wolves. He weathered brutal temperatures in the wild to document the wolves and provided exceptional insights into wolf behavior. Haber's writings and photographs reveal an astonishing degree of cooperation between wolf family members as they hunt, raise pups, and play social behaviors and traditions previously unknown. With the wolves at risk of being destroyed by hunting and trapping, his studies advocated for a balanced approach to wolf management. His fieldwork registered as one of the longest studies in wildlife science and had a lasting impact on wolf policies. Haber's field notes, his extensive journals, and stories from friends all come together in *Among Wolves* to reveal much about both the wolves he studied and the researcher himself. Wolves continue to fascinate and polarize people, and Haber's work continues to resonate.

*A Woman Among Wolves* Diane K. Boyd, 2024-09-10 WINNER OF THE NATIONAL OUTDOOR BOOK AWARD. This is a book about a courageous woman. Often alone in wild country, she endures hardships and faces danger in many forms. It is a book I highly recommend: informative, fascinating, and beautifully written.

DR. JANE GOODALL: A debut memoir from one of the first women biologists in the United States to study wild wolves in their natural habitat: a story of passion, resilience, and determination. Called the Jane Goodall of wolves, world-renowned wildlife biologist Diane Boyd has spent four decades studying and advocating for wolves in the wilds of Montana near Glacier National Park. When she started in the 1970s, she was the only female biologist in the United States researching and radio-collaring wild wolves. With her two dogs for company, she faced the rigors of the Montana winter in an isolated cabin without running water or electricity. Boyd fearlessly forded icy rivers, strapped on skis to navigate thick stands of lodgepole pine, and monitored packs from the air in a tiny bush plane that skimmed the treetops so she could count wolves and see what they were feeding on. She faced down grizzly bears, mountain lions, wolverines, and the occasional trapper as she stalked her quarry: a handful of wolves that were making their way south from Canada into Montana. Resilient and resourceful, she devised her own trapping methods and negotiated with locals as wolf populations grew from the first natural colonizer to more than 3,000 wolves in the West today. In this captivating book, Boyd takes the reader on a wild ride from the early days of wolf research to the present-day challenges of wolf management across the globe, highlighting her interactions with an apex predator that captured her heart and her undying admiration. Her writing resonates with her indomitable spirit as she explores the intricate balance of human and wolf coexistence.
