An Ethics Of Personality:

Types of Men Eduard Spranger, 1928 **An Ethics of Personality** Agnes Heller, 1996 In this closing volume of the author's trilogy *A Theory of Morals* Heller addresses the existence of morality after the death of God She explores Nietzsche's ethics of personality as exemplified in his critical engagement with Wagner's *Parsifal* in his *A Genealogy of Morals* and examines the case for a non-absolutist ethics employing ideas, norms, and rules from traditional and modern moral philosophies particularly those of Kant and Kierkegaard Annotation copyright by Book News Inc Portland OR *Types of Men* Eduard Spranger, Paul John William Pigors, 1966 **Ethics and Personality** John Deigh, 1992 Attachment, trust, respect, integrity, conscience, guilt, shame, revenge, depravity, gratitude, and forgiveness are among the topics discussed in this broad-ranging volume This collection of thirteen essays focuses on emotions and motives that relate to our status as moral agents, our capacity for moral judgment, and the practices that help to define our social lives Some of the authors develop new lines of thought within a recognized school of philosophy or a well-established program of research Others present novel conceptions of their subject independently of any single school or program Collectively each essay in *Ethics and Personality* represents a time-honored tradition in ethics studies designed to throw light on fundamental questions within the discipline through investigation of the complexities of the human soul *Ethics and Personality* is a suitable text for advanced-level courses and graduate seminars in ethics and philosophical psychology *Varieties of Moral Personality* Owen Flanagan, 1993-01-01 Owen Flanagan argues in this book for a more psychologically realistic ethical reflection and spells out the ways in which psychology can enrich moral philosophy Beginning with a discussion of such moral saints as Gandhi, Mother Teresa, and Oskar Schindler Flanagan charts a middle course between an ethics that is too realistic and socially parochial and one that is too idealistic, giving no weight to our natures **Character and Moral Psychology** Christian B. Miller, 2014-01-09 Philosophers and psychologists have been hard at work trying to unlock the mysteries of our characters Unfortunately, their answers have been all over the map According to one position, every single person has all of the moral virtues such as modesty and compassion, although to varying degrees Yet according to another position, no one has any character traits at all since they are simply illusions and do not exist Hence, not one person is honest or compassionate or courageous And between these extremes, there are plenty of intermediate views Christian B. Miller argues that not one of these leading positions accurately reflects what most of us are like today He explores the implications of the Mixed Trait framework, a theory of moral character developed in his previous book *Moral Character: An Empirical Theory* Mixed traits have both morally positive aspects, hence they are not vices, along with morally negative aspects, hence they are not virtues Miller engages with the other leading positions on the empirical nature of character: situationism, the CAPS model, the Big Five model, and the local trait model He goes on to apply the Mixed Trait framework to several important topics in ethics, especially the development of an error theory about judgments of character and the challenge faced by virtue ethics from the

widespread lack of virtue *Ethics and Personality* Robin Wildt Hansen,2024-05-15 Do you know what you value at the deepest level Knowing your core value is the key to making life choices that align harmoniously with your inner self This book presents a way to acquire that knowledge It is connected with how Jung s psychological types relate to ethical values I will present you with a detailed ethical and psychological analysis that I conducted on eight people belonging to two of the sixteen types of the Myers Briggs Type Indicator MBTI The study isolates the core value of the INFP as well as that of the ENFP and results in a surprising insight that looks applicable to all types **The Treatment of Personality by Locke, Berkeley and Hume** Jay William Hudson,1911 **Ágnes Heller and Hannah Arendt** Ángel Prior Olnos,Ángel Rivero,2018-09-30 This book reconstructs through texts by gnes Heller and international scholars a timely conversation between Hannah Arendt and Heller on the malaises of modernity This valuable work will be appreciated both by academics and students interested in social and political philosophy in addition to the wider public curious of intellectual history Both Arendt and Heller are great thinkers with the ability to enlighten the great moral and political problems of our time Although these two great figures belong to different generations the dialogue reconstructed here provides a fuller picture of the demise of the great totalitarian forces of the twentieth century Both Arendt and Heller in a sense accepted the burden of understanding the evils of their age It is however Heller by addressing the perennial problems of modernity posed by Arendt who makes this conversation possible illuminating the problems of this century **Freedom and Dissatisfaction in the Works of Agnes Heller** Lucy Jane Ward,2016-12-27 Ward s book focuses on the work of the Hungarian philosopher Agnes Heller prominent member of the Budapest School a group of students who studied under the Marxist social theorist Gy rgy Luk cs For both Marx and Heller albeit in different ways dissatisfaction emerges as the inevitable result of the expansion of need s within modernity and as a catalyst for the development of anthropological wealth what Marx refers to as the human being rich in need Ward argues that dissatisfaction and the corresponding category of human wealth as both motif and method is central to grasping Heller s seemingly disparate writings While Marx postulates a radical overcoming of dissatisfaction Heller argues dissatisfaction is integral not only to the on going survival of modernity but also to the dynamics of both freedom and individual life In this way Heller s work remains committed to a position that both continually returns and departs is both with and against the philosophy of Marx This book will be of interest to scholars of political philosophy social theory critical theory and sociology Engaging Agnes Heller Katie Terezakis,2009-03-16 This collection of essays examines the life and thought of Agnes Heller who rose to international acclaim as a Marxist dissident in Eastern Europe then went on to develop one of the most comprehensive oeuvres in contemporary philosophy putting forward a distinctive ethical theory and analyses of a vast range of topics covering most every philosophical area Here philosophers sociologists journalists and political scientists contextualize compare and assess different elements of Heller s work the collection as a whole highlights relevant shifts within that work as well as its intrinsic consistency Essays in the collection address the

relationship between philosophy political practice and everyday life Heller s theory of modernity and her ethical theory her recent scholarship on comedy and the Biblical book of Genesis her theories of radical needs and radical politics her aesthetic theory and questions about her relationship to feminist theory The collection includes Heller s reflections on the collected essays as well as an early essay on her mentor Luk cs that exposes her own steadfast engagement with certain practical and philosophical issues throughout her life s work From Personality to Virtue Alberto Masala,Jonathan Webber,2016-02-25

Character plays a central role in our everyday understanding and evaluation of ourselves and one another It informs the expectations that ground our plans and projects our moral responses to other people s behaviour and to opportunities we ourselves face and our political decisions concerning formal education criminal punishment and other aspects of social organisation The very idea that people have persisting character traits that explain their behaviour is woven throughout the fabric of our culture These philosophical essays clarify this idea of character analyse its relation with the findings of experimental psychology and draw out the implications of this for education and for criminal punishment They bring together a range of issues in contemporary philosophy including the nature of agency the modelling of behavioural cognition ethical implications of personal necessity moral responsibility for implicit bias the prospects for character education and the nature of rightful criminal punishment The essays emphasise that character is inherently dynamic challenging the tendency among personality psychologists and virtue ethicists alike to focus on static snapshots of traits and they emphasise the close integration of character with the individual s social context seeking to accommodate the situationist experimental findings within a picture of behaviour as manifesting stable character traits The volume is intended to demonstrate the deep conceptual affinity of moral philosophy and social psychology and the consequent potential for each to benefit from the other

the many arguments concerning freedom The true question at issue it should always be borne in mind is that of the free person This personal reference of ethical conceptions points to the view that the logically validating ground of all such terms is to be found in a finally self sustaining doctrine of the person That is to say ethics presupposes the reality of the ethical person The true question that the moralist must answer stated in terms reminiscent of Kant is How is the ethical person possible Owing to the interdependence of all ethical conceptions Professor Hudson feels justified in looking at the subject from a restricted aspect What is the nature of a free person If we go no further than the domain of natural science no such person can exist science denies autonomy to persons But Kant so we are reminded with interesting conviction has demonstrated that science itself presupposes the a priori knower Whatever else may be said of an ethical person he is essentially the a priori knower The prime object of this study is to show that any attempt to establish any other theory of personality ends in self refutation The particular attempt considered is English empiricism To let the author speak for himself To summarize in one sentence our threefold task is to present the treatment of personality by Locke Berkeley and Hume especially with reference to the place of the a priori in that treatment with the subsidiary aim of showing by a sort of illustrative dialectic in each case and together the necessity of the a priori for any personality such as they tried to guarantee and such as is adequate for ethics Thus our aim is plainly a restricted one The working out of a total ethics or metaphysics is the least of the intention The most that can be essayed is to indicate one logical condition which such a total view must observe the logical condition of rational self activity in the sense of a priori cognition While Locke is interested primarily in the limitation of human knowledge he has much to say in regard to personality He is intuitively certain of his own existence but this certainty is not for him what it was for Descartes a logical first principle Though the implication of his treatment may not always uphold it the essay is pervaded with dualistic presuppositions from beginning to end experience seems to uphold the existence of both mind and body Thought however is not a substance it inheres in spiritual substance The real nature of the soul is not for Locke such an important consideration which leads Professor Hudson to suspect that he did not truly understand the task that he had in hand Thinking and willing are peculiar to the soul existence duration and motion are shared with matter Identity of the self is needful to guarantee accountability but this is not necessarily identity of substance it is rather a continued consciousness distinct from substance This has the advantage of taking accountability out of the uncertain field of metaphysics and after all it is the conscious person that is accountable Locke s treatment of freedom is viewed as quite inadequate though there are now and then hints at a true view of the subject The person is not autonomous but the will is determined by uneasiness The Journal of Philosophy Psychology and Scientific Methods 1912
