Classical Methods Of Statistics:

Classical Methods of Statistics Otto J.W.F. Kardaun, 2005-12-12 Classical Methods of Statistics is a guidebook combining theory and practical methods. It is especially conceived for graduate students and scientists who are interested in the applications of statistical methods to plasma physics. Thus it provides also concise information on experimental aspects of fusion oriented plasma physics. In view of the first three basic chapters it can be fruitfully used by students majoring in probability theory and statistics. The first part deals with the mathematical foundation and framework of the subject. Some attention is given to the historical background. Exercises are added to help readers understand the underlying concepts. In the second part two major case studies are presented which exemplify the areas of discriminant analysis and multivariate profile analysis respectively. To introduce these case studies an outline is provided of the context of magnetic plasma fusion research. In the third part an overview is given of statistical software; separate attention is devoted to SAS and S PLUS. The final chapter presents several datasets and gives a description of their physical setting. Most of these datasets were assembled at the ASDEX Upgrade Tokamak. All of them are accompanied by exercises in form of guided minor case studies. The book concludes with translations of key concepts into several languages.

Kendall's Advanced Theory of Statistics 2B Anthony O'Hagan, 2010-03-08 Kendall's *Advanced Theory of Statistics* and Kendall's *Library of Statistics*. The development of modern statistical theory in the past fifty years is reflected in the history of the late Sir Maurice Kendall's volumes *The Advanced Theory of Statistics*. *The Advanced Theory* began life as a two volume work and since its first appearance in 1943 has been an indispensable source for the core theory of classical statistics. With Bayesian Inference the same high standard has been applied to this important and exciting new body of theory.
