Bioethics Beyond the Headlines Albert R. Jonsen, 2005-08-25 Bioethics asks fundamental questions Who lives Who dies Who decides These questions are relevant to us all Too often the general public's sole encounter with these weighty questions is through sound bites fed to us by the media where complex difficult matters are typically presented in superficial and inaccurate terms Here renowned bioethicist Albert R Jonsen equips readers with the tools and background to navigate the fascinating and complex landscape of bioethics Bioethics Beyond the Headlines is a primer You will not find convoluted philosophical arguments in this volume Rather you will find an engaging sampling of the key questions in bioethics including euthanasia assisted reproduction cloning and stem cells neuroscience access to healthcare and even research on animals and questions of environmental ethics areas typically overlooked in general introductions to bioethics But a primer is not merely a first book it should also prime the interest of the reader to prepare the mind for a more expansive venture into these issues Bioethics Beyond the Headlines intends to do just that

society Biotechnology offers exciting prospects for healing the sick and relieving suffering But because our growing powers also enable alterations in the workings of the body and mind they are becoming attractive to healthy people who would just like to look younger perform better feel happier or become more perfect This landmark book the product of more than sixteen months of research and reflection by the members of the President s Council on Bioethics explores the profound ethical and social consequences of today s biotechnical revolution Almost every week brings news of novel methods for screening genes and testing embryos choosing the sex and modifying the behavior of children enhancing athletic performance slowing aging blunting painful memories brightening mood and altering basic temperaments But we must not neglect the fundamental question Should we be turning to biotechnology to fulfill our deepest human desires We want better children but not by turning procreation into manufacture or by altering their brains to gain them an edge over their peers We want to perform better in the activities of life but not by becoming mere creatures of chemistry We want longer lives but not at the cost of becoming so obsessed with our own longevity that we care little about future generations We want to be happy but not by taking a drug that gives us happy feelings without the genuine loves attachments and achievements that are essential to true human flourishing As we enjoy the benefits of biotechnology members of the council contend we need to hold fast to an account of the human being seen not in material or mechanistic or medical terms but in psychic moral and spiritual ones By grasping the limits of our new powers we can savor the fruits of the age of biotechnology without succumbing to its most dangerous temptations Beyond Therapy takes these issues out of the narrow circle of bioethics professionals and into the larger public arena where matters of this importance rightly belong
