*Machine Learners* Adrian Mackenzie,2017-11-16 If machine learning transforms the nature of knowledge does it also transform the practice of critical thought Machine learning programming computers to learn from data has spread across scientific disciplines media entertainment and government Medical research autonomous vehicles credit transaction processing computer gaming recommendation systems finance surveillance and robotics use machine learning Machine learning devices sometimes understood as scientific models sometimes as operational algorithms anchor the field of data

science They have also become mundane mechanisms deeply embedded in a variety of systems and gadgets In contexts from the everyday to the esoteric machine learning is said to transform the nature of knowledge In this book Adrian Mackenzie investigates whether machine learning also transforms the practice of critical thinking Mackenzie focuses on machine learners either humans and machines or human machine relations situated among settings data and devices The settings range from fMRI to Facebook the data anything from cat images to DNA sequences the devices include neural networks support vector machines and decision trees He examines specific learning algorithms writing code and writing about code and develops an archaeology of operations that following Foucault views machine learning as a form of knowledge production and a strategy of power Exploring layers of abstraction data infrastructures coding practices diagrams mathematical formalisms and the social organization of machine learning Mackenzie traces the mostly invisible architecture of one of the central zones of contemporary technological cultures Mackenzie s account of machine learning locates places in which a sense of agency can take root His archaeology of the operational formation of machine learning does not unearth the footprint of a strategic monolith but reveals the local tributaries of force that feed into the generalization and plurality of the field
