**Biotechnology in Crop Protection** Brian Robert Kerry, 1998      Pesticide Application Methods G. A. Matthews, Roy Bateman, Paul Miller, 2014-03-31 PESTICIDE APPLICATION METHODS Pesticide Application Methods is the standard work for all those involved in crop protection This fully revised and expanded edition provides up to date information on the different types of application techniques and how they should be used to ensure efficient and effective pest control The third edition of this excellent book was published more than 10 years ago since when a number of important developments have taken place Examples include changes to legislation both in the EU and USA concerning water quality This has an impact on how spray is applied and more particularly how the sprayer is designed to minimise quantities that remain in the equipment when spraying is completed and in addition inform how and when the sprayer is cleaned Concern about spray drift has also continued and has led to more research on how to reduce the amount of spray that moves downwind from a treated area Important new information on this topic is included within the new edition Professor Graham Matthews has been joined by two new co authors to increase the breadth and depth of coverage in this updated edition of Pesticide Application Methods This important new edition is a commercially significant reference tool and will be of great use and interest to all those working in crop protection including agricultural entomologists and plant pathologists pesticide scientists advisors and consultants large scale growers agricultural and horticultural scientists agrochemical industry personnel including those involved in equipment supply and product formulation Libraries in government and commercial research establishments universities and agricultural colleges where agricultural and biological sciences are studied and taught should have multiple copies of this definitive book on their shelves

**Principles of Field Crop Production** J. E. Pratley, 2003 Commercial crop production in the 21st century is a highly technical pursuit There is an economic imperative for farmers to make a reasonable living through increased productivity cost containment and market satisfaction Contending with the variability of the Australian climate remains a major challenge Of increasing importance is the environmental imperative the need to manage soil structure decline erosion acidity and salinity Involved also are biodiversity preservation and the water reform agenda The fourth edition of Principles of Field Crop Production addresses these issues and provides a contemporary understanding involved in the production of crops in Australia The book provides background on the evolution of farming systems A new chapter on climate variability and its predictability is included as are new treatments of rotations weeds pests and diseases An introduction to supply chain management provides the reader with an understanding of market forces All chapters have been updated and the principles clearly defined
