James Matthew Barrie

Bird Boypb1988:

Dickey Downy the Autobiography of a Bird Virginia Sharpe Patterson,2018-06-28 Dickey Downy The Autobiography of a Bird by Virginia Sharpe Patterson This beautiful volume has been written for a good purpose I had the pleasure of reading the proof sheets of the book while in the Yellowstone National Park where no gun may be lawfully fired at any of God s creatures All animals there are becoming tame and the great bears come out of the woods to feed on the garbage of the hotels and camps fearless of the tourists who look on with pleasure and wonder at such a scene The child is father of the man and this volume is addressed to the heart and imagination of every child reader If children are taught to love and protect the birds they will remember the lesson when they grow old When children learn to prefer to take a snap shot at a bird with a camera rather than with a gun they will protect these feathered friends for their beauty even if they do not regard them for their usefulness We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

Barrie,2019-09-25 Reproduction of the original The Little White Bird by J M Barrie **Wake-Robin** John Burroughs,2020-03-31 Wake Robin by John Burroughs Spring in our northern climate may fairly be said to extend from the middle of March to the middle of June At least the vernal tide continues to rise until the latter date and it is not till after the summer solstice that the shoots and twigs begin to harden and turn to wood or the grass to lose any of its freshness and succulency It is this period that marks the return of the birds one or two of the more hardy or half domesticated species like the song sparrow and the bluebird usually arriving in March while the rarer and more brilliant wood birds bring up the procession in June But each stage of the advancing season gives prominence to certain species as to certain flowers The dandelion tells me when to look for the swallow the dog toothed violet when to expect the wood thrush and when I have found the wake robin in bloom I know the season is fairly inaugurated With me this flower is associated not merely with the awakening of Robin for he has been awake some weeks but with the universal awakening and rehabilitation of nature Yet the coming and going of the birds is more or less a mystery and a surprise We go out in the morning and no thrush or vireo is to be heard we go out again and every tree and grove is musical yet again and all is silent Who saw them come Who saw them

depart This pert little winter wren for instance darting in and out the fence diving under the rubbish here and coming up yards away how does he manage with those little circular wings to compass degrees and zones and arrive always in the nick of time Last August I saw him in the remotest wilds of the Adirondacs impatient and inquisitive as usual a few weeks later on the Potomac I was greeted by the same hardy little busybody Does he travel by easy stages from bush to bush and from wood to wood or has that compact little body force and courage to brave the night and the upper air and so achieve leagues at one pull And yonder bluebird with the earth tinge on his breast and the sky tinge on his back did he come down out of heaven on that bright March morning when he told us so softly and plaintively that if we pleased spring had come Indeed there is nothing in the return of the birds more curious and suggestive than in the first appearance or rumors of the appearance of this little blue coat The bird at first seems a mere wandering voice in the air one hears its call or carol on some bright March morning but is uncertain of its source or direction it falls like a drop of rain when no cloud is visible one looks and listens but to no purpose The weather changes perhaps a cold snap with snow comes on and it may be a week before I hear the note again and this time or the next perchance see the bird sitting on a stake in the fence lifting his wing as he calls cheerily to his mate Its notes now become daily more frequent the birds multiply and flitting from point to point call and warble more confidently and gleefully Their boldness increases till one sees them hovering with a saucy inquiring air about barns and outbuildings peeping into dove cotes and stable windows inspecting knot holes and pump trees intent only on a place to nest
