The history of molecular biology in Germany is closely linked to the Institute of Genetics in Cologne, the first molecular biological institute at a German university. Founded in 1959 by the migr physicist and future Nobel laureate Max Delbrück, the Institute was the first in Germany to implement less hierarchical American organizational structures and research habits. The Institute had already gained an excellent international scientific reputation by the beginning of the 1960s. This volume comprises the recollections of scientists pertaining to the Institute's research organization and other specificities. Articles by historians of science analyze the historical background and international framework of the Institute's foundations and genetic research. In addition, the scientists discuss contemporary questions of science policy with regard to teaching and the impact of the internal structures of scientific institutions on the quality of research. **Race, Intelligence and Bias in Academe** Roger Pearson, 1997. This book documents efforts in American academe and the media to suppress research into the important role played by race and heredity in determining intelligence and other vital human qualities. It presents scientific evidence of the significance of heredity and details how well-known scholars have been intimidated from speaking the truth. It provides concrete evidence of media distortion and reveals the Marxist orientation of scholars who have persistently attempted to deny the importance of genetic differences in humankind. Contents include Hans J. Eysenck, *Science and Racism*; *Science and Heredity* from Francis Galton and Karl Pearson to World

War II The Legacy of Marx Mannheim and Lysenko Scientific Luddites and Neo Lysenkoists The Anti science Views of Gould Lewontin Kamin and Marxist Student Organizations The Persecution of Scholars who Investigate Race Differences Arthur Jensen of Berkeley Nobel Laureate and co inventor of the transistor William Shockley Guggenheim Fellow J Philippe Rushton E O Wilson R J Herrnstein M Levin L Gottfredson and Seymour Itzkoff The Bell Curve Activist Lysenkoism in Academe the Media and Public Policy Conclusion The Influence of Heredity on Human Personality as Confirmed by the findings of the Minnesota Twin and Adoption Research and the Human Genome Project *Intellectual Migration and Cultural Transformation* Edward Timms,Jon Hughes,2003 The volume presents a unique cross section of contemporary research in the broad field of migration and exile studies Its particular focus is on the manner in which ideas methodologies scholarship and innovation developed in German speaking Europe were transferred to Britain and the USA after 1933 The transformative effect of this exodus of talent upon the host cultures and the corresponding impact of the host cultures upon the refugees helped produce the groundbreaking work of German speaking refugees in diverse areas The essays include surveys of the contributions of exiles to academic disciplines and to art and design and fresh examinations of the work of prominent refugees like Wittgenstein as well as less well known figures such as Nina Rubinstein and Gaby Schreiber Thought ,1953 **The American Biology Teacher** ,2003 **The British National Bibliography** Arthur James Wells,1998 **Translation Review** ,1998 **Secret Weapons and World War II** Walter E. Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East **BOOK JACKET Encounter** Stephen Spender,Irving Kristol,1972-07
