ABSTRACT

Since 1970, the share of Black individuals living in suburbs of large cities has risen from 16 to 36 percent. This shift is as large as the post-World War II wave of the Great Migration. We first show that Black suburbanization has led to major changes in neighborhoods, accounting for a large share of recent increases in both the average Black individual's neighborhood quality and within-Black income segregation. We then show that changes in relative suburban amenities and housing prices explain about 60 and 30 percent, respectively, of Black suburbanization, while regional reallocation, changing educational attainment, and gentrification play only minor roles.

JEL Classification Codes: R23, J15, J11

Black Suburbanization:

Places of Their Own Andrew Wiese, 2009-04-24 On Melbenan Drive just west of Atlanta sunlight falls onto a long row of well kept lawns Two dozen homes line the street behind them wooden decks and living room windows open onto vast woodland properties Residents returning from their jobs steer SUVs into long driveways and emerge from their automobiles They walk to the front doors of their houses past sculptured bushes and flowers in bloom For most people this cozy image of suburbia does not immediately evoke images of African Americans But as this pioneering work demonstrates the suburbs have provided a home to black residents in increasing numbers for the past hundred years in the last two decades alone the numbers have nearly doubled to just under twelve million Places of Their Own begins a hundred years ago painting an austere portrait of the conditions that early black residents found in isolated poor suburbs Andrew Wiese insists however that they moved there by choice withstanding racism and poverty through efforts to shape the landscape to their own needs Turning then to the 1950s Wiese illuminates key differences between black suburbanization in the North and South He considers how African Americans in the South bargained for separate areas where they could develop their own neighborhoods while many of their northern counterparts transgressed racial boundaries settling in historically white communities Ultimately Wiese explores how the civil rights movement emboldened black families to purchase homes in the suburbs with increased vigor and how the passage of civil rights legislation helped pave the way for today s black middle class Tracing the precise contours of black migration to the suburbs over the course of the whole last century and across the entire United States Places of Their Own will be a foundational book for anyone interested in the African American experience or the role of race and class in the making of America s suburbs Winner of the 2005 John G Cawelti Book Award from the American Culture Association Winner of the 2005 Award for Best Book in North American Urban History from the Urban History Association

Black Politics in Transition Candis Watts Smith, Christina Greer, 2018-10-17 Black Politics in Transition considers the impact of three transformative forces immigration suburbanization and gentrification on Black politics today Demographic changes resulting from immigration and ethnic blending are dramatically affecting the character and identity of Black populations throughout the US Black Americans are becoming more ethnically diverse at the same time that they are sharing space with newcomers from near and far In addition the movement of Black populations out of the cities to which they migrated a generation ago a reverse migration to the American South in some cases and in other cases a movement from cities to suburbs shifts the locus of Black politics At the same time middle class and white populations are returning to cities displacing low income Blacks and immigrants alike in a renewal of gentrification All this makes for an important laboratory of discovery among social scientists including the diverse range of authors represented here Drawing on a wide array of disciplinary perspectives and methodological strategies original chapters analyze the geography of opportunity for Black Americans and Black politics in accessible jargon free language Moving beyond the Black white binary

this book explores the tri part relationship among Blacks whites and Latinos as well Some of the most important developments in Black politics are happening at state and local levels today and this book captures that for students scholars and citizens engaged in this dynamic milieu

Black Suburbanization and the Evolution of Spatial Inequality Since 1970 Alexander W. Bartik,Evan Mast,2021 Since 1970 the share of Black individuals living in suburbs of larger cities has risen from 16 to 36 percent We present three facts illustrating how this suburbanization has changed spatial inequality First suburbanization entirely accounts for Black households relative improvements in several key neighborhood characteristics while Black city dwellers saw declines Second suburbanization accounts for over half of the increase in within Black income segregation Selective Black migration and muted suburban White flight both contribute to these patterns Third total Black population in central cities has plummeted since 2000 driven by young people and declines in high poverty majority Black neighborhoods

Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Black Suburbanization : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
