Copy Fights Adam D. Thierer, Clyde Wayne Crews, 2002-08-25 The Internet has often been labeled a disruptive technology and nowhere has that been more clearly the case than in the field of intellectual property IP law Although debates over IP policy have raged in academic circles and law and economics journals for decades with the rise of the Internet IP issues have captured the public's collective attention like never before Suddenly the teenage creator of file swapping sensation Napster appeared on the

cover of Time magazine as the mass media took notice of an explosion of interest in digital downloads CD burning and widespread peer to peer file sharing among the general public But the mass movement to share songs and other digital content online was met with a firestorm of criticism from copyright and patent holders who struck back with a vengeance filing lawsuits and pursuing legislative and regulatory remedies for what they regarded as intellectual property piracy on a scale never before envisioned This debate has sparked a newfound interest in timeless questions about the nature of intellectual property and how it should be protected including why do we protect intellectual property at all do we really have property rights in our intangible creations the same way we have property rights to our homes and our land aren't there better ways to encourage artistic creation and scientific discovery than through the use of copyright and patent laws that protect a limited monopoly Copy Fights presents a thought provoking exploration of these questions

Intellectual property rights in an age of electronics and information, 1986 *Understanding Copyright* Bethany Klein, Giles Moss, Lee Edwards, 2015-04-14 Digital technology has forever changed the way media is created accessed shared and regulated raising serious questions about copyright for artists and fans media companies and internet intermediaries activists and governments Taking a rounded view of the debates that have emerged over copyright in the digital age this book Looks across a broad range of industries including music television and film to consider issues of media power and policy Features engaging examples that have taken centre stage in the copyright debate including high profile legal cases against Napster and The Pirate Bay anti piracy campaigns the Creative Commons movement and public protests against the expansion of copyright enforcement Considers both the dominant voices such as industry associations and those who struggle to be heard including ordinary media users drawing on important studies into copyright from around the world Offering media students and scholars a comprehensive overview of the contemporary issues surrounding intellectual property through the struggle over copyright

Understanding Copyright explores why disagreement is rife and how the policymaking process might accommodate a wider range of views

Intellectual Property in the Information Age Jeffrey C. Sun, Benjamin Baez, 2010-04-22 This monograph pays special attention to the intellectual property of copyrights and patents It examines how legal parameters competing interests and technological advances take shape in economic political and social contexts that require colleges and universities make intellectual property central to their operations Economic political and social forces are redefining knowledge as property that can be owned and institutions of higher education as producers of knowledge are central participants of this phenomenon Debates about intellectual property are rampant some arguing that knowledge should not become a commodity for exchange others than intellectual property fosters innovation in society What is not debatable is the importance of the law for resolving disputes about intellectual property Today the evolving legal context association with intellectual property and technological advancements have created competing interests and demands from individuals institutions and even nations The law is often the realm in which these interests and disputes

take place with more or less satisfying results Colleges and universities must grapple with not only complex legal issues but also the philosophical and political consequences associated with the conversion of intellectual acts into property This is the fourth issue in the 34th volume of the Jossey Bass series ASHE Higher Education Report Each monograph in the series is the definitive analysis of a tough higher education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

The State of Copyright Debora Halbert, 2014-02-05 This book seeks to make an intervention into the ongoing debate about the scope and intensity of global copyright laws While mapping out the primary actors in the context of globalization and the modern political economy of information ownership the argument is made that alternatives to further expansion of copyright are necessary By examining the multiple and competing interests in creating the legal regime of copyright law this book attempts to map the political economy of copyright in the information age critique the concentration of ownership that is intrinsic in the status quo and provide an assessment of the state of the contemporary global copyright landscape and its futures It draws upon the current narratives of copyright as produced by corporate government and political actors and frames these narratives as language games within a global political project to define how information and culture will be shared and exchanged in the future The text problematizes the relationship of the state to culture comments on the global flows of culture and critiques the regulatory apparatus that is in place to commodify culture and align it with the contemporary nation state In the end the possibility of non commodified and more open futures are explored The State of Copyright will be of particular interest for students and scholars of international political economy law political science anthropology sociology cultural studies library sciences and communication studies It also will appeal to a growing popular audience that has taken an interest in the issues of copyright

Current Legal Issues in Publishing A. Bruce Strauch, 1996 Current Legal Issues in Publishing sheds light on important issues of the ever changing often confusing world of copyright licensing and taxation as we move into the twenty first century You will see how the questions of ownership fair use and licensing have become exacerbated by the fact that information is no longer static but rather fluid and transportable In an age of advancing technology this book anticipates how Congress and the courts will be called upon with more and more frequency to maintain a balance between the copyright holder's economic interests

and society's right to have access to information Reading this book will give you an understanding of the fundamental aspects and concepts of the Copyright Act such as what constitutes an original work for what categories copyright protection is available and the basic rights of the copyright holder and how they are being challenged in the digital world The information and copyright landscape as you will quickly perceive becomes even more hazy in the context of the public library and university where special rights to information exist to facilitate learning and scholarship Using this book as a tool you will learn that because the future of the electronic age is unpredictable copyright holders and university and library communities must work together to remain flexible and recognize the others interests particularly in the legislative arena Comprehensive and informative Current Legal Issues in Publishing looks at the copyright debate from many different perspectives including from the creator user community and legal angles Among the important topics you will read about are the Uruguay Round Agreement the responsibility of copyright university ownership of faculty copyrights American Geophysical Union v Texaco Inc the Newark Morning Ledger Case library privileges and fair use legal aspects of electronic publishing on line distribution rights As you read Current Legal Issues in Publishing and are introduced to the origins and development of copyright conventions the measures taken to combat book piracy and the conflict between industrial nations and developing ones over copyright issues you will form your own conclusions to the arguments for and against the current worldwide copyright system You will also see that questions of ownership and economic and market rights are inextricably linked with questions of power and who can or cannot have access to information **Australian Intellectual Property Journal** ,1994
