**Corporate Governance** Simon Learmount, 2002. This book explores current thinking on corporate governance by way of a detailed study of the governance practices of fourteen

Japanese companies The author was granted extensive access to these Japanese companies as well as to their partner companies their shareholders and their banks and is therefore able to provide a detailed insight into the way that Japanese companies are actually governed on a day to day basis The book suggests that current mainstream conceptualizations of corporate governance are inadequate as they do not help to understand the way that these Japanese companies are directed and controlled in practice In the majority of cases governance operates through a system which draws on the reciprocal obligations responsibilities and trust generated in everyday interactions at the individual and organizational level The conclusions of the research have important implications not only for our understanding of the Japanese system of corporate governance but also for international corporate governance policy and research in general In particular the book commends greater recognition that alongside the currently dominant concern controlling the behaviour of company managers the governance of companies might equally be considered in terms of the responsibilities reciprocal obligations and trust inherent in everyday interactions The book is equally accessible and relevant to both academics and to those involved with corporate governance issues on a day to day basis including financial services providers lawyers policymakers and company directors

### **Responsible Corporate Governance** Maria Aluchna, Samuel O. Idowu, 2017-05-10

This book discusses the tasks and functions of corporate governance in the light of current challenges and the dynamics that arise from a broader approach to company management and the integration of corporate governance with corporate social responsibility, CSR and sustainability. Addressing the corporate governance shortcomings that are believed to have contributed to the recent financial crisis, it explores the interplay between corporate governance and CSR and includes examples of company practice to show how such changes affect the practices of shareholders, boards of directors and regulators. In particular, the book examines shareholders' activities, their different investment strategies, specific reporting expectations and the submission of proposals to the annual meeting. Further, for boards of directors, it explores the need to revise their tasks with respect to the criteria for executive appointments, their corporate strategy, performance measures and diversity recommendations, while for directors, it provides recommendations to reconsider the structure of executive pay and performance incentives. Lastly, for regulators, the book investigates the need to introduce new laws addressing, for instance, the need for integrated reporting, limiting the voice of short term oriented shareholders and providing guidelines for executive compensation.

### Corporate Governance in Latvia – Does It Follow the Pattern of the U S ?

Ausra Liepinyte, 2010. Seminar paper from the year 2010 in the subject Politics International Politics Region Russia grade 4-8. University of Basel WWZ course Seminar CG language English abstract. Corporate Governance (CG) is an often discussed theme especially in Western Europe and in the U S after the financial crisis 2007-2010. However, in Latvia which suffered the

most in the European Union EU from the economic crisis this is seemingly not a subject of debates This poses the question whether Latvia is an emerging market in the sense of the development of CG Therefore I chose to look at this issue more closely The U S CG system influences the most important national CG systems in the world and as there is a lot of research done on the CG in the U S it seems to be interesting to compare the development of the CG in the U S with that in Latvia The fact that CG is getting a more and more important issue in Latvia is shown e g in the foundation of the Baltic Institute of Corporate Governance in 2009 The Institute s aim is to promote development of responsible CG in the Baltic States As it is a new organisation it does not yet have any publications on CG in the Baltic States released In addition there is actually no up to date research on CG in Latvia In 2002 the World Bank conducted the Corporate Governance Assessment based on the OECD principles of CG There is the recently in 2009 published book Corporate Governance in Transition Economies edited by R W McGee It contains also an article on CG in Latvia which in fact is a summary of the CG assessment by the World Bank in 2002 Regarding all the aspects mentioned above the analysis of CG in Latvia provides a very interesting research area as it has been insufficiently researched until now Moreover a comparison with a well established CG system like that in the U S could be a source of useful information and recommendations for Latvia s companies
