Higher Education, Meritocracy and Inequality in China Ye Liu, 2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for social mobility Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education

When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it offers a valuable resource for researchers and non specialist readers alike You Are What You Watch Walter Hickey,2023-10-24 Pulitzer Prize winning author and data expert Walt Hickey explains the power of entertainment to change our biology our beliefs how we see ourselves and how nations gain power Virtually anyone who has ever watched a profound movie a powerful TV show or read a moving novel understands that entertainment can and does affect us in surprising and significant ways But did you know that our most popular forms of entertainment can have a direct physical effect on us a measurable impact on society geopolitics the economy and even the future itself In You Are What You Watch Walter Hickey Pulitzer Prize winner and former chief culture writer at acclaimed data site FiveThirtyEight com proves how exactly how what we watch and read and listen to has a far greater effect on us and the world at large than we imagine Employing a mix of research deep reporting and 100 data visualizations Hickey presents the true power of entertainment and culture From the decrease in shark populations after *Jaws* to the increase in women and girls taking up archery following *The Hunger Games* You Are What You Watch proves its points not just with research and argument but hard data Did you know for example that crime statistics prove that violent movies actually lead to less real world violence And that the international rise of anime and Manga helped lift the Japanese economy out of the doldrums in the 1980s Or that British and American intelligence agencies actually got ideas from the James Bond movies In You Are What You Watch readers will be given a nerdy and sobering celebration of popular entertainment and its surprising power to change the world **Positive**
