How the West Was White-Washed C.T. Kirk,2020-11-03 The American West is often seen from the historical accounts recorded from the beginning of the Civil War to after the Reconstruction Era Many of the accounts include historians that promote a European Anglo Saxon perspective these accounts have often led readers to stereotypical perspectives concerning minorities These accounts also give birth to the white savior concept in which white men assume the role as savior to lesser races in movies such as saving the African Americans during slavery or in the case of many White Westerners being the hero to Native American people Hollywood s portrayal of Westerners did not happen by accident but many historians in the late 19th and early 20th centuries purposely ignored the accounts and contributions of other races The narrative trope of the white savior is one way the mass communications medium of cinema represents the sociology of race and ethnic relations by presenting abstract concepts such as morality as characteristics innate racially and culturally to white people not to be found in non white people In other words had Hollywood sought accurate information and represented it in the narratives for shows like The Lone Ranger the show would have been cast with an African American actor since the role was based solely on the life of black lawman Bass Reeves A White Savior film is often based on some supposedly true story Second it features a nonwhite group or person who experiences conflict and struggle with others that is particularly dangerous or threatening to their life and livelihood

Imagining the African American West Blake Allmendinger,2005-01-01 The literature of the African American West is the last racial discourse of the region that remains unexplored Blake Allmendinger addresses this void in literary and cultural studies with *Imagining the African American West* the first comprehensive study of African American literature on the early frontier and in the modern urban American West Allmendinger charts the terrain of African American literature in the West through his exploration of novels histories autobiographies science fiction mysteries formula westerns melodramas experimental theater and political essays as well as rap music and film He examines the histories of James P Beckwourth and Oscar Micheaux slavery the Civil War and the significance of the American frontier to blacks and the Harlem Renaissance the literature of urban unrest rap music black noir and African American writers including Toni Morrison and Walter Mosley His study utilizes not only the works of well known African American writers but also some obscure and neglected works out of print books and unpublished manuscripts in library archives Much of the scholarly neglect of the Black West can be blamed on how the American West has been

imagined constructed and framed in scholarship to date In his study Allmendinger provides the appropriate theoretical cultural and historical contexts for understanding the literature and suggests new directions for the future of black western literature

Strategies for Success among African-Americans and Afro-Caribbeans Chrystal Y. Grey, Thomas Janoski, 2017-12-18 How can African Americans and Afro Caribbeans from the former British colonies be so different in their approaches toward social mobility Chrystal Y Grey and Thomas Janoski state that this is because native blacks grow up as strangers in their own country and immigrants from the English speaking Caribbean are conversely part of the dominant group Unlike previous research that compares highly educated Afro Caribbeans to the broad range of African Americans this study holds social class constant by looking only at successful blacks in the upper middle class from both groups This book finds that African Americans pursue overachievement strategies of working much harder than others do while Afro Caribbeans follow an optimistic job strategy expecting promotions and success However African Americans are more likely to use confrontational strategies if their mobility is blocked The main cause of these differences is that Afro Caribbeans grow up in a system where they have many examples of black politicians and business leaders 35 90% of their countries are black and African Americans have fewer role models 12 14% of the United States are black Further the schooling system in Afro Caribbean countries does not label blacks as underachievers because the schools are almost entirely black A further problem that African Americans face is the resentment of a small but significant number of blacks who have little social mobility They accuse socially mobile African Americans of acting white which is a phenomenon that Afro Caribbeans almost never face and they call it an African American thing To demonstrate this difference Strategies for Success among African Americans and Afro Caribbeans does a historical comparative analysis of the differences between the black experience after slavery in the United States and Jamaica Trinidad and Tobago Guyana and St Kitts Nevis The authors interview fifty seven black people and find consistent differences between the US and Caribbean black citizens Using theories of symbolic interaction and resentment this work challenges previous studies that either claim that Afro Caribbeans are more motivated than African Americans or studies that show that controlling for class each group is more or less the same

Immigrants in American History Elliott Robert Barkan, 2013-01-17 This encyclopedia is a unique collection of entries covering the arrival adaptation and integration of immigrants into American culture from the 1500s to 2010 Few topics inspire such debate among American citizens as the issue of immigration in the United States Yet it is the steady influx of foreigners into America over 400 years that has shaped the social character of the United States and has favorably positioned this country for globalization Immigrants in American History Arrival Adaptation and Integration is a chronological study of the migration of various ethnic groups to the United States from 1500 to the present day This multivolume collection explores dozens of immigrant populations in America and delves into major topical issues affecting different groups across time periods For example the first author of the collection

profiles African Americans as an example of the effects of involuntary migrations A cross disciplinary approach derived from the contributions of leading scholars in the fields of history sociology cultural development economics political science law and cultural adaptation introduces a comparative analysis of customs beliefs and character among groups and provides insight into the impact of newcomers on American society and culture

The African Diaspora in the United States and Canada at the Dawn of the 21st Century John W. Frazier, Joe T. Darden, Norah F. Henry, 2010-09-01 Drawing on the work of social scientists from geographic historical sociological and political science perspectives this volume offers new perspectives on the African Diaspora in the United States and Canada It has been approximately four centuries since the first Africans set foot in North America and although it is impossible for any text to capture the complete Black experience on the continent the persistent legacy of Black inequality and the winds of dramatic change are inseparable parts of the current African Diaspora experience In addition to comparing and contrasting the experiences and geographic patterns of the African Diaspora in the United States and Canada the book also explores important distinctions between the experiences of African Americans and those of more recent African and Afro Caribbean immigrants

Black Frontiers Lillian Schlissel, 2000-02 From an informative text by expert Lillian Schlissel young readers can learn about amazing contributions that African Americans made to the settling of the Old West and see vintage photos of black Americans both at work and at home
