Coronary Care Nursing:

Contemporary Issues in Coronary Care Nursing Fiona Timmins, 2005-08-15 In this text Fiona Timmins integrates the findings of recent nursing research with key aspects of the nurse's role. She provides an evidence-based rationale for the best ways of improving cardiac care in general and for specific conditions, describes important nursing initiatives to reduce the risk factors, and presents a needs-based approach to patient education. Concerned with the need to bridge the current research-practice gap in coronary care, she knows how nurses can make the best use of available research and describes the advances that are being made in nurse-led services in this area. *Contemporary Issues in Coronary Care Nursing* offers a non-medical approach to coronary care and is informed throughout by the latest nursing theory and research. *Coronary Care Nursing* English National Board for Nursing, Midwifery, and Health Visiting, 1990
