A *Comprehensive Study of Female Offenders* Martin Guevara Urbina,2008 Few empirical studies have focused on women in prison In the last few years though a number of studies have demonstrated that there are fundamental differences between male and female prisoners in an ever changing penal system Consequently there has been a need for more comprehensive studies of female offenders for three primary reasons 1 imperative research gaps remain to be bridged 2 the female prison experience is not constant and 3 prison rates for female offenders especially minority offenders have increased considerably in the last few years A central goal of this book then is to provide a balance to the existing literature and research on female prisoners in the United States and to an extent abroad focusing primarily on female offenders and using data gathered from the Wisconsin Department of Corrections The book utilizes a comprehensive investigative approach by equating the experience of female offenders by the totality of circumstances within an historical institutional political and ideological context The critical objective is to offer an inclusive analysis of the things that are considered by female inmates to be the most significant before during and after their incarceration as a way of better understanding the reasons that lead to their first incarceration as well as subsequent incarcerations By reading this book the reader will have a greater understanding of the many challenges facing female inmates as well as the relationship between inmates correctional officers and by extension society in general Also provided is a series of policy recommendations throughout the book particularly in the concluding
