Cannibals Cows And The Cjd Catastrophe:

Cannibals, Cows and the CJD Catastrophe Jennifer Cooke, 1998 This story begins and ends in morgues It is a chilling medical detective story which traces the explosion of accidentally acquired CJD Creutzfeldt Jacob Disease in humans from the highlands of PNG to fertility programmes in Australia and to the British dining table It deals with the key characters involved in parallel epidemics both of which first became public knowledge in April 1985 The announcement of a probable beef related epidemic of a so called new variant of CJD Mad Cow s Disease on March 20 1996 forced the British Government to admit there may be a lethal contamination of the country s meat products While the British struggle to allay public fears over beef products the world also faces a growing epidemic of accidental medical transmission of CJD This is a disease which kills as devastatingly as AIDS and as surely as the Ebola virus but it has a symptom free incubation period that means a generation could pass before the chilling signs of infection emerge As compelling as a science fiction thriller this story has serious implications for Australia and countries around the world

Dying for a Hamburger Murray Waldman, Marjorie Lamb, 2025-06-25

One in ten people older than sixty five and nearly half of those older than eighty five have Alzheimer s disease It s widely accepted nowadays that memory loss comes with age Alzheimer s currently robs at least 15 million people of their identity worldwide This book makes the controversial claim that eating meat may contribute to the development of the disease In Dying for a Hamburger Dr Murray Waldman and Marjorie Lamb draw upon documentary evidence historical testimony and inspired speculation to suggest that Alzheimer s is a new disease elderly people did not experience symptoms of dementia in such alarming numbers in the past

began appearing after modern meat production techniques were introduced has soared in nations where these techniques are used hardly exists in cultures where meat consumption is low has been attributed to many deaths that are actually the human equivalent of mad cow disease They present startling evidence that Alzheimer s may be part of a family of diseases linked to malformed proteins known as prions They hypothesize that the conditions that allow these brain disorders to be triggered are similar They propose that mad cow its human equivalent Creutzfeldt Jakob disease CJD other encephalitic diseases and Alzheimer s may have a common antecedent We know that a form of CJD is transmitted to humans who eat contaminated beef And we are becoming increasingly aware of the need to monitor the meat supply closely to avoid a repetition of the mad cow scare in Great Britain But suppose that Alzheimer s also involves prions the evidence that points in this direction is growing And suppose that Alzheimer s is also associated with tainted meat This conclusion seems far fetched at first In this compelling book the authors come to a frightening conclusion about our seemingly insatiable hunger for hamburgers Destined to provoke heated argument this book on the prevention of Alzheimer s is definitely food for thought

Perspectives on Consumers' Access to Justice Charles E. F. Rickett,Thomas G. W. Telfer,2003-03-20 Consumer protection law in the age of globalisation poses new challenges for policy makers This book highlights the difficulties of framing regulatory responses to the problem of consumers access to justice in the new international economy The growth of international consumer transactions in the wake of technological change and the globalisation of markets suggests that governments can no longer develop consumer protection law in isolation from the international legal arena Leading scholars consider the broader theme of access to justice from socio legal law and economics perspectives Topics include standard form contracts the legal challenges posed by mass infections such as mad cow disease and CJD ombudsman schemes class actions alternative dispute resolution consumer bankruptcy conflict of laws and cross border transactions This book demonstrates that advancing and achieving access to justice for consumers proves to be a challenging and sometimes elusive task *The Collectors of Lost Souls* Warwick Anderson,2008-11-28 This riveting account of medical detective work traces the story of kuru a fatal brain disease and the pioneering scientists who spent decades searching for its cause When whites

first encountered the Fore people in the isolated highlands of colonial New Guinea during the 1940s and 1950s they found a people in the grip of a bizarre epidemic Women and children succumbed to muscle weakness uncontrollable tremors and lack of coordination until death inevitably supervened Facing extinction the Fore attributed their unique and terrifying affliction to a particularly malign form of sorcery The Collectors of Lost Souls tells the story of the resilience of the Fore through this devastating plague their transformation into modern people and their compelling attraction for a throng of eccentric and adventurous scientists and anthropologists Battling competing scientists and the colonial authorities the brilliant and troubled American doctor D Carleton Gajdusek determined that the cause of kuru was a new and mysterious agent of infection which he called a slow virus now called prions Anthropologists and epidemiologists soon realized that the Fore practice of eating their loved ones after death had spread the slow virus Though the Fore were never convinced Gajdusek received the Nobel Prize for his discovery The study of kuru opened up a completely new field of medical investigation challenging our understanding of the causes of disease But The Collectors of Lost Souls is far more than a tantalizing case study of scientific research in the twentieth century It is a story of how a previously isolated people made contact with the world by engaging with its science rendering the boundary between primitive and modern completely permeable It tells us about the complex and often baffling interactions of researchers and their erstwhile subjects on the colonial frontier tracing their ambivalent exchanges passionate engagements confused estimates of value and moral ambiguities Above all it reveals the primitive foundations of modern science This astonishing story links first contact encounters in New Guinea with laboratory experiments in Bethesda Maryland sorcery with science cannibalism with compassion and slow viruses with infectious proteins reshaping our understanding of what it means to do science
