United States. Office of Management and Budget, 1997 **Managing Green Business Model Transformations** Axel Sommer, 2012-05-20 Environmental sustainability creates both tremendous business opportunities and formidable threats to established companies across virtually all industry sectors Yet many companies tackle the issue in a superficial or passive way rather than considering fundamental changes to their existing business models By ignoring the opportunities of Green Business Model Transformations companies exclude themselves from a large variety of potential means to create economic value In addition to ordinary product and process innovations they can change the rules of the game within an industry towards environmental sustainability Green Business Model Transformations however are challenging ventures New green business models with all their uncertainties and inherent complex systemic characteristics are difficult to design assess and implement successfully particularly in the context of established companies that often entail complex structures and considerable inertia As a result there is a great need for guidance in management practice This publication addresses this need with a general approach to Managing Green Business Model Transformations that is based on a broad theoretical foundation illustrated by many real world examples from various industry sectors **Ranking Independent Timber**

Investments by Alternative Investment Criteria Thomas John Mills, 1982 A sample of 231 independent timber investments were ranked by internal rate of return present net worth per acre and the benefit cost ratio the last two discounted by 3 6 4 7 5 and 10 percent to determine if the different criteria had a practical influence on timber investment ranking The samples in this study were drawn from a group of timber investments partially financed by Forestry Incentives Program costshare funds The investment rankings were quite similar among the three criteria Under constrained investment budgets the benefit cost criteria produced the investment selection with the greatest cumulative present net worth Under less severe budget constraints all three criteria produced investment selections with essentially the same cumulative present net worth *Capital Budgeting Valuation* H. Kent Baker, Philip English, 2011-05-04 An essential guide to valuation

techniques and financial analysis With the collapse of the economy and financial systems many institutions are reevaluating what they are willing to spend money on Project valuation is key to both cost effectiveness measures and shareholder value The purpose of this book is to provide a comprehensive examination of critical capital budgeting topics Coverage extends from discussing basic concepts principles and techniques to their application to increasingly complex real world situations Throughout the book emphasizes how financially sound capital budgeting facilitates the process of value creation and discusses why various theories make sense and how firms can use them to solve problems and create wealth Offers a strategic focus on the application of various techniques and approaches related to a firm s overall strategy Provides coverage of international topics based on the premise that managers should view business from a global perspective Emphasizes the importance of using real options Comprised of contributed chapters from both experienced professionals and academics Capital Budgeting Valuation offers a variety of perspectives and a rich interplay of ideas related to this important financial discipline
