**Humanity Uprooted** Maurice Gerschon Hindus, 1929 1929 A Russian returns to his country following the Revolution and chronicles the moral decay of the society This is a fascinating sociological study of the effects on ordinary people of the socialist experiment that followed the Russian Revolution Hindus attempts to give a picture of the results of the revolutionary effort in Russia to uproot ancient institutions and to refashion the ways of man into a society without religion with sexual freedom with external compulsions removed from family and love with mental and manual workers reduced to a plane of equality with the individual depending for his salvation not on himself but the group

**Perilous Passage** Amiya Kumar Bagchi, 2008-01-28 In this innovative and ambitious global history distinguished economic historian Amiya Kumar Bagchi critically analyzes the processes leading to the rise of the West since the sixteenth century to its current position as the most prosperous and powerful group of nations in the world Integrating the history of armed conflict with the history of competition for trade investment and markets Bagchi explores the human consequences for people both within and outside the region He characterizes the emergence and operation of capitalism as a system driven by wars over resources and markets rather than one that genuinely operates on the principle of free markets In tracing this history he also charts what happened to the people who came under its sway during the last five centuries Bagchi thus broadens our understanding of the nature and history of capitalism and challenges the fetishism of commodities that limits

the perspective of most economic historians The book also challenges the Eurocentrism that still underlies the conceptual framework of many mainstream historians joining earlier narratives that chronicle the history of human beings as living persons rather than as puppets serving the abstract cause of economic growth His unflinching examination of the human costs of development not only in the colonial periphery but in the core nations includes not only economic processes and issues of inequality within and among nations but also the intertwining of economics and war making on a world scale The book also contributes to our knowledge of how and in what sequence human health has been shaped by public health care sanitation modern medicine income levels and nutrition Written with extraordinary range and depth *Perilous Passage* will change the ways in which we think about many of the largest issues in world history and development *Black Separatism and Social Reality* Raymond L. Hall, 2013-10-22 *Black Separatism and Social Reality* Rhetoric and Reason deals with the contemporary debate over black separatism in America It brings together for the first time many of the perspectives ideas orientations and ideologies that all directly or indirectly address the question of black separatism pro and con from the vantage point of their own realities It raises fundamental issues that have recurred throughout the last century and continue unabated today such as whether black Americans should seek their political destiny apart from white Americans or whether economic growth within the black community can eventually lead to true black power This book is comprised of 31 chapters and begins with a historical overview and social reality of black separatism in America how and why black separatist movements emerge and why separatism appeals to some individuals and not to others The next section explores the similarities of white racist assumptions and black separatism as well as the arguments for and against separatism The prospects of black separatism are analyzed along with Pan Africanism and black studies A comprehensive review of the history of separatist thought and a bibliography concerning the relation of Afro Americans with Africa are presented The possibility of a violent confrontation between whites and blacks is also considered Finally the book ponders the question of whether there is a need for a distinct black social science This monograph will appeal to sociologists social scientists political scientists politicians blacks and scholars of black studies *Humanity Uprooted* Maurice Hindus, 1930 *U.S. Trotskyism 1928-1965. Behbehani,2023-05-31 China s foreign policy in the Arab world is important because it reflects China s general foreign policy In this study first published in 1981 the author draws upon a wealth of previously unpublished and inaccessible material to analyse Chinese attitudes in three cases the two Arab liberation movements the Palestine Resistance Movement and the Popular Front for the Liberation of the Oman and the established and independent State of Kuwait Since the Arab liberation movements played a significant political role within their fields of operation it was necessary for China to decide whether these movements did actually fit in with Chinese foreign policy objectives Dr Behbehani s analysis of these two case studies provides the basis for a discussion of whether China s motives in supporting the liberation movements are theoretical or purely practical China s support for Kuwait s political internal continuity is related to the stability of the whole Gulf region The author analyses Chinese support for Kuwait and the surrounding conservative states on two main bases political and economic in the form of trade It is through these channels particularly the economic one that China has sought to establish itself in the Gulf and the Arabian peninsula *Review of International Co-operation* ,1914 **The American Labor Year Book** ,1920 **Keeping the Promise** Dennis Carlson,C.
