Stance cars are typically focused on high power and performance. They stand out by having extremely low and stiff suspension, perfect for track racing. Their primary characteristic is negative camber, which can make the wheels of the car appear like they are about to fall off, however, it greatly increases straight-line speed and acceleration.

Car Cultures:

Car Cultures Daniel Miller, 2020-05-26 Anyone who assumes that a car is simply a means to get from point A to point B or who even thinks that they know what a car is should read this book Profoundly shaped by culture the car gives rise to a wide range of emotions from guilt about the environment in the UK to aboriginal concerns with car corpses to struggles to keep the creatures alive with everything but the proper spare parts in West Africa Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis and are capable of inspiring epic passions From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US this book examines the essential humanity of the car which includes the jealousies gender differences fears and moralities that cars give rise to Firmly grounded in detailed ethnographic and historical scholarship this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture

Autopia Peter Wollen, Joe Kerr, 2002 The reach of the car today is almost universal and its effect on landscapes cityscapes cultures indeed on the very fabric of the modern world is profound Cars have brought benefits to individuals in terms of mobility and expanded horizons but the cost has been very high in terms of damage to the environment and the consumption of precious resources Despite the growing belief that a Faustian price is now being paid for the freedom cars have bestowed on us we are none the less manufacturing them in ever greater numbers *Autopia* is the first book to explore the culture of the motor car in the widest possible sense Featuring newly commissioned essays by writers critics historians artists and film makers as well as reprinting key texts it examines the effect of the car throughout the world including the USA Western and Eastern Europe Japan China Cuba India and South Africa In this book the car is treated neither as a technological fetish object nor as an instrument of danger Instead it is examined as a hugely important determinant of 20th century culture neither wholly good nor an unmitigated disaster and certainly endlessly fascinating Contributors include Michael Bracewell Ziauddin Sardar Al Rees Martin Pawley Donald Richie and Peter Hamilton Key texts by Marshall Berman Jane Jacobs Roland Barthes Marc Auge and others

Drive Time Peter Sebastian Chesney, 2021 This project began with questions about the tremendous amount of time those in Los Angeles have spent inside their automobiles *Drive Time* argues for the significance of car cultures as sites where drivers articulated numerous varieties of social difference which have included sexual racial moral and spatial hierarchies Sensory studies has proven a helpful methodology for work about undocumented uses of technology for drivers left traces of their hidden activities and personal attitudes all over their vehicles and along roadside strips in the half century after the
