Guidelines for understanding pet food formulations and health claims differentiate between market speak and actual clinical benefits for patients with practice advice for evaluating and selecting appropriate foods [Canine and Feline Nutrition](#),2000 **Canine and feline nutrition and dietetics** Debora Guidi,2021-03-11T00:00:00+01:00 The centrality of nutrition in the state of health of pets has emerged only in the recent years both to prolong their life expectancy and to prevent the onset of serious diseases such as obesity diabetes mellitus or liver lipidosis The goal of this book is that each veterinarian can clearly answer the questions that are most frequently asked by the owners Which type of food to choose How to navigate between the different products on the market The text also provides real recipes to be proposed in synergy with the nutritional handbooks of various food manufacturers to consciously choose and be able to compare the nutritional characteristics of different products on the market Nutrition is a fundamental aspect in the relationship between owners and pets and for this reason the text also gives great importance to aspects related to behavior and alimentary disturbances on an emotional basis **Canine and Feline Nutrition** ,2011 *Recent Advances in Canine and Feline Nutrition* ,1998 *The Principle of Canine and Feline Nutrition* Shelley Keller,2021-07-08 It can happen to anyone at any time You come across a wonderful dog or cat that is looking for a home and gives you that big eyed look that says Pick me You ll be buying dog food and treats at your local supermarket before you know it It s simple to fall in love with your pet Sharing your home with a canine companion can be extremely rewarding There s no denying that dogs can provide unconditional acceptance and loyalty as well as constant companionship and stress relief after a long or stressful day There are a lot of things to consider if you want to keep a cat or dog as a pet However the most important of it is the pet s Nutrition What will you feed it Would you be able to tell if your cat or puppy needed to lose weight You might not even realize your cat is overweight because they are so common However obese and overweight cats now outnumber healthy weight cats and veterinarians are seeing more super obese dogs and cats The issue for us is that we like to spoil our cats and cats like to eat so it s easy to overfeed them Cats require more of a variety of essential nutrients whereas dogs can survive on very little As a result cat food contains more protein fat minerals and vitamins Cat food is also smaller and higher in calories to accommodate their smaller mouths How much should I give my dog in terms of food Does the food I m giving my dog meet his nutritional requirements As our understanding of the relationship between diet and health advances and the number of dog foods available grows it s more important than ever to make feeding decisions based on sound information Nutrient Requirements of Dogs and Cats is the basis for the information in this book [Canine and Feline Nutrition for Veterinary Nurses](#) NICOLA.
