## **Cantarella Volume 1 Cantarella:**

**Cantarella, Volume 1** You Higuri, Yū Higuri, 2005 From birth Cesare Borgia is surrounded by shadows Damned by his own father and driven by the demons his quest for power threatens to set the world of Renaissance Italy ablaze unless one innocent person can drive away the poisonous shadows ravaging him Enter the world of the Borgias a world of unspeakable conspiracies and forbidden desires A family whose murderous intrigues would make them infamous throughout history A history written in blood and a poison called Cantarella From brand new publisher Go Comi an imprint of Go Media Entertainment

*Dionysus, Christ, and the Death of God, Volume 1* Giuseppe Fornari, 2020-09-01 This magisterial reflection on the history and destiny of the West compares Greco Roman civilization and the Judeo Christian tradition in order to understand what both unites and divides them Mediation understood as a collective symbolic experience gives society unity and meaning putting human beings in contact with a universal object known as the world or reality But unity has a price the very force that enables peaceful coexistence also makes us prone to conflict As a result in order to find a common point of convergence of at one moment someone must be sacrificed Sacrifice then is the historical pillar of mediation It was endorsed in a cosmic religious sense in antiquity and rejected for ethical reasons in modernity where the Judeo Christian tradition plays an intermediate role in condemning sacrificial violence as such while accepting sacrifice as a voluntary act offered to save other human beings Today as we face the collapse of all shared mediations this intermediating solution offers a way out of our moral and cultural plight

**Behavioural and Network Impacts of Driver Information Systems** Richard Emmerink, Peter Nijkamp, 2018-03-28 Originally published in 1999 this volume contains a systematic collection of both theoretical and applied studies on user information systems for road users It is generally expected that reliable information offered to road users will improve the use of scarce capacity on transport networks but from a research perspective the question arises whether the provision of such hardware and software will influence the behaviour of road users to such an extent that a more desirable traffic situation will emerge The book contains European American and Asian contributions and presents advances and findings in the field of theoretical simulation and empirical models on driver information systems and behaviour whilst also paying attention to the design of such systems

[The Borgia Family](#) Jennifer Mara DeSilva, 2019-10-11 *The Borgia Family Rumor and Representation* explores the historical and cultural structures that underpin the early modern Borgia family their notoriety and persistence and reinvention in the popular imagination The book balances studies focusing on early modern observations of the Borgias and studies deconstructing later incarnations on the stage on the page on the street and on the screen It reveals how contemporary observers later authors and artists and generations of historians reinforced and perpetuated both rumor and reputation ultimately contributing to the Borgia Black Legend and its representations Focused on the deeds and posthumous reputations of Pope Alexander VI and his children Cesare and Lucrezia Borgia the volume charts the choices made by the family and contextualizes them amid contemporary expectations

and reactions Extending beyond their deaths it also investigates how the Borgias became emblems of anti Catholic and anti Spanish criticism in the later early modern period and their residing reputation as the best and worst of the Renaissance Exploring a spectrum of traditional and modern media The Borgia Family contextualizes both Borgia deeds and their modern representations to analyze the family s continuing history and meaning in the twenty first century It will be of great interest to researchers and students working on interdisciplinary aspects of the Renaissance and early modern Italy

**Laughing at domestica facta** Giuseppe Eugenio Rallo,2024-01-22 In this monograph the author embarks on a captivating journey to shed fresh light on the togata a mid Republican theatrical genre which survives only in fragments The book seeks to answer pressing questions surrounding the togata s significance in identity construction during the middle Republic from a literary and cultural perspective Delving deep into the fragmentary textual remains of the togata the book explores how the Roman elite fashioned their identity The author challenges the notion of monolithic identity construction and explores the diverse forms of identity within the togata offering a new perspective on the subject This study thus positions the togata as a vital source for discerning the characteristics and beliefs by which the Romans distinguished themselves and their culture from others By examining how Romans perceived themselves their ideas about different social groups and their literary and cultural ties to earlier traditions this book aims to transform our understanding of the togata s role in Roman drama

**Birth of Nomos** Zartaloudis Thanos Zartaloudis,2018-11-14 This is a highly original interdisciplinary study of the archaic Greek word nomos and its family of words More recently used to mean simply law or law making Thanos Zartaloudis draws out the richness of this fundamental term by exploring its many roots and uses over the centuries The Birth of Nomos includes extracts from ancient sources in both the original and English translation including material from legal history philosophy philology linguistics ancient history poetry archaeology ancient musicology and anthropology Through a thorough analysis of these extracts we gain a new and complete understanding of nomos and its foundational place in the Western legal tradition

**Modeling and Optimization of Air Traffic** Daniel Delahaye,Stéphane Puechmorel,2013-07-01 This book combines the research activities of the authors both of whom are researchers at Ecole Nationale de l Aviation Civile French National School of Civil Aviation and presents their findings from the last 15 years Their work uses air transport as its focal point within the realm of mathematical optimization looking at real life problems and theoretical models in tandem and the challenges that accompany studying both approaches The authors research is linked with the attempt to reduce air space congestion in Western Europe USA and increasingly Asia They do this through studying stochastic optimization particularly artificial evolution the sectorization of airspace route distribution and takeoff slots and by modeling airspace congestion Finally the authors discuss their short medium and long term research goals They hope that their work although related to air transport will be applied to other fields such is the transferable nature of mathematical optimization At the same time they intend to use other areas of research such as approximation and statistics to complement their continued inquiry in their

*Dynamic Decision and Adjustment Processes in Commuter Behavior Under Real-time Information* Karthik K. Srinivasan,Hani S. Mahmassani,2002 Advanced Traveler Information Systems ATIS by providing real time traffic information can assist trip makers in selecting efficient travel choices and aid the attainment of desirable system goals including reduced costs and increased efficiencies The success of ATIS in achieving such goals critically depends on user behavior in response to information This research focuses on investigating dynamic aspects in commuter behavior under real time information A dynamic interactive travel behavior simulator that enables a consistent representation of the nonlinear time dependent interactions between network performance trip makers choices and information is used to observe trip maker behavior Using the simulator interactive experiments are conducted where a range of experimental factors including network loading day to day traffic evolution and ATIS information strategies are varied and the consequent trip maker behavior is observed Constituent models are proposed to analyze the choice dimensions of route departure time and compliance The dynamic kernel logit DKL formulation is presented for analyzing these data and its theoretical and computational suitability established The results confirm the significance of compliance and inertia as key mechanisms influencing route choice Departure time adjustments appear to be based on a sequential heuristic search Calibrated models

also provide evidence of learning adjustment perception judgment and updating processes in trip maker behavior Empirical results indicate that real time information and time dependent network conditions are strong determinants of trip maker behavior in a commuting context The nature and quality of ATIS information accuracy and reliability the magnitude of network loading and its day to day evolution and users past traffic experience are important influences on how commuters select routes and departure times At the unobserved level general dynamic and stochastic patterns including heterogeneity state dependence habit persistence and correlations are present in trip makers decisions These substantive results have important implications for network state prediction travel demand forecasting design and evaluation of ATIS services and deployment of Intelligent Transportation System ITS programs User behavior models developed here can be integrated with dynamic network traffic assignment models to obtain more accurate system performance modeling capabilities with considerable applications in tactical and strategic system planning and traffic operations

*The Origins and Role of Same-Sex Relations in Human Societies* James Neill,2009 In this groundbreaking work the author challenges what some call the heterosexual myth arguing that human sexuality is not as absolute as prevalent thought suggests Drawing on historic and current data the book instead argues that historically human sexuality has been ambiguous and that very few humans are by nature exclusively homosexual or heterosexual
