sports with the startling facts of physiological reality Stark narrates a series of outdoor adventure stories in which thrill can cross the line to mortal peril Each death or brush with death is at once a suspense story a cautionary tale and a medical thriller Stark describes in unforgettable detail exactly what goes through the mind of a cross country skier as his body temperature plummets apathy at ninety one degrees stupor at ninety He puts us inside the body of a doomed kayaker tumbling helplessly underwater for two minutes five minutes ten minutes He conjures up the physiology of a snowboarder frantically trying not to panic as he consumes the tiny pocket of air trapped around his face under thousands of pounds of snow These are among the dire situations that Stark transforms into harrowing accounts of how our bodies react to trauma how reflexes and instinct compel us to fight back and how why and when we let go of our will to live In an increasingly tamed and homogenized world risk is not only a means of escape but a path to spirituality As Peter Stark writes You must try to understand death intimately and prepare yourself for death in order to live a full and satisfying life In this fascinating informative book Stark reveals exactly what we re getting ourselves into when we choose to live and die at the extremes of endurance
