Basic Problems Of Ethnopsychiatry:

Basic Problems of Ethnopsychiatry George Devereux, 1980 In these sixteen essays written between 1939 and 1965 George Devereux argues that the understanding of all human behavior requires the application of both psychological and sociocultural methods of explanation This unique approach which differentiates sanity and insanity from social adjustment and maladjustment provides a rigorous foundation for a general theory of psychoanalytic ethnopsychiatry George Devereux a psychoanalyst and anthropologist discusses crime sexual delinquency dreams in non Western cultures and cannibalistic drives of parents He frequently cites case material from his extensive field work with the Mahave Indians of Arizona and the Sedang Moi of Vietnam and from his clinical work with non Western patients **Ethnopsychiatry** Henri F.

Ellenberger, 2020-12-17 What is the relationship between culture and mental health Is mental illness universal Are symptoms of mental disorders different across social groups In the late 1960s these questions gave rise to a groundbreaking series of articles written by the psychiatrist Henri Ellenberger who would go on to publish *The Discovery of the Unconscious: The History and Evolution of Dynamic Psychiatry* in 1970 Fifty years later they are presented for the first time in English translation introduced by historian of science Emmanuel Delille *Ethnopsychiatry* explores one of the most controversial subjects in psychiatric research the role of culture in mental health In his articles Ellenberger addressed the complex clinical and theoretical problems of cultural specificity in mental illness collective psychoses differentiations within cultural groups and biocultural interactions He was especially attuned to the correlations between rapid cultural transformations in postwar society urbanization and the frequency of mental illness Ellenberger drew from a vast and varied primary and secondary literature in several languages as well as from his own findings in clinical practice which included work with indigenous peoples In analyzing Ellenberger's contributions Delille unveils the transnational and interdisciplinary origins of transcultural psychiatry which grew out of knowledge networks that crisscrossed the globe The book has a rich selection of appendices including Ellenberger's lecture notes on a case of peyote addiction and his correspondence with anthropologist and psychoanalyst Georges Devereux These original essays and their masterful contextualization provide a compelling introduction to the foundations of transcultural psychiatry and one of its most distinguished and prolific researchers

Chicago Psychoanalytic Literature Index, 1984 **Adventures in the Archaic** Ryan L. Allen, 2026-01-26 Examines how four intellectuals with ties to the French social sciences articulated a new primitivist sensibility between 1945 and 1975 We tend to associate primitivism with the nostalgic idealization of origins often aimed at parts of the world that are viewed as closer to that idealized past than modern post industrial society Primitivist impulses still exist in popular culture whether in paleo diets or returns to foraging and they can also be seen in intellectual and political circles in debates around the possibility of degrowth In this book historian Ryan L Allen examines primitivism anew through four fascinating figures Georges Bataille Henri Lefebvre Georges Devereux and Mircea Eliade In the postwar period Allen shows the French social

sciences reappraised the primitive and archaic from anthropological sociological psychiatric and religious angles These four thinkers sought past alternatives to midcentury hypermodernization and capitalist excess They put forth trenchant critiques of contemporary society and sought in the archaic past a way to imagine a more sustainable future Adventures in the Archaic rehabilitates these thinkers showing how their critique of growth and consumerism was nourished by an engagement with primitive cultures as potential sources of cultural and ecological wisdom As we confront planetary crisis Allen suggests there is still much we can learn from these iconoclastic approaches [Handbook of Immigrant Health](#) Sana Loue,2013-11-11 Here is the first comprehensive cross disciplinary work to examine the current health situation of our immigrants successfully integrating the vast literature of diverse fields epidemiology health services research anthropology law medicine social work health promotion and bioethics to explore the richness and diversity of the immigrant population from a culturally sensitive perspective This unequalled resource examines methodological issues issues in clinical care and research health and disease in specific immigrant populations patterns of specific diseases in immigrant groups in the US and conclusive insight towards the future Complete with 73 illustrations this singular book is the blueprint for where we must go in the future **Western Rationality and the Angel of Dreams** Murray Lionel Wax,1999 Throughout recorded time people have been fascinated by dreams and their meanings Tribal societies valorize knowledge obtained from dreams and respect possession as a channel for revelation In contrast implicit in Western intellectual thought is an image of the human as a non social atom with a unitary and rational mind which turns dreaming into an epiphenomenon or for Freud a neurosis in miniature Integrating materials from anthropology post Freudian psychoanalysis social evolution and the social psychology of Mead Cooley James and Sullivan this book offers a view of the self and the psyche that provides meaning to the views of traditional peoples on dreams possession and the loss of self **Anthropological Literature** ,1981 Describes articles and essays on anthropology and archaeology including art history demography economics psychology and religious studies Indexes articles two or more pages long in works published in English and other European languages Internet version covers from the 19th century to the present **Handbook of Cultural Psychiatry** Wen-Shing Tseng,2001-06-06 Cultural psychiatry is primarily concerned with the transcultural aspects of mental health related to human behavior psychopathology and treatment At a clinical level cultural psychiatry aims to promote culturally relevant mental health care for patients of diverse ethnic or cultural backgrounds From the standpoint of research cultural psychiatry is interested in studying how ethnic or cultural factors may influence human behavior and psychopathology as well as the art of healing On a theoretical level cultural psychiatry aims to expand the knowledge and theories about mental health related human behavior and mental problems by widening the sources of information and findings transculturally and providing cross cultural validation This work represents the first comprehensive attempt to pull together the clinical research and theoretical findings in a single volume Key Features Written by a nationally and internationally well known author and scholar The material focuses not only on the United States but also
