

CABLE MODEM/ROUTER WITH WIRELESS-N QUICK START

This Quick Start description is specific to the Cable Modem/Router with Wireless-N. A cable modem service is an Internet service for computers where other host devices in the home (tablets, phones, smart phones, etc.) receive information about network status, such as the user's bandwidth (C/S).

Package Contents

- Cable Modem/Router
- Power cord
- Ethernet LAN cable
- CD with user manual

Before installing Your Cable Modem

The cable modem/router needs to know your modem's MAC ADDRESS, which is a unique address on the system of government. This information is used to identify cable modem services. If your cable modem/router is being sold by a third party (OEM), the manufacturer's name, location may be added to provide the modem's model name and number, which is a **MACID**. If you need the modem's serial number, you can find it from the MAC address on the modem's label.

System Requirements

- The modem/Router for cable modem use cable modem service that uses one of the modem MACID numbers: 10, 13, 17, 1, 4. If you need to get cable modem service, please check with your cable service provider.
- To use the Quick Start, you need a computer, an IPv4 or IPv6 address.

If your cable service provider provided a cable modem starter kit, please confirm cable. You will not have to install but to use the cable modem starter kit from your manufacturer, go to the **How to connect to a computer if you don't have or don't want to use a cable modem starter kit**.

If your cable service provider provided a cable modem starter kit

Some cable service providers supply a cable modem starter kit that includes everything you need to get started. The kit may include a modem cable for connecting to your computer's LAN port and your cable modem. (There are also models of modem/router/switches, Internet modem/router/switches, among other models in the kit.) If you need to know more about the kit, go to the **How to connect to a computer if you don't have or don't want to use a cable modem starter kit**. The modem is LAN 10, 13, 17, 1, 4, and you need to use a normal cable modem.

We advised to plug in the modem's power cord, connect to the modem service, change modem cable, and then connect to a computer using either the provided Ethernet cable or the network feature (connecting the Cable Modem/Router to Your Computer).

Note: Please refer to the Hardware Connection section. You will find it in the chapter of the user manual of the cable modem with description of the connection.

After you have installed your cable modem with the recommended setup using cable network, you cable modem can connect your computer to the Internet.

Note: When I do Ethernet is power up the first time, you need to connect the cable modem/router with LAN cable to connect to the Internet. You will find it in the chapter of the user manual of the cable modem with description of the connection.
