A Study In Creative History:

A study in creative history Ormond Edward Burton,1971 **Historical Research, Creative Writing, and the Past**
Kevin A. Morrison,Pälvi Rantala,2023-07-12 Although historical research undertaken in different disciplines often requires speculation and imagination it remains relatively rare for scholars to foreground these processes explicitly as a knowing method Historical Research Creative Writing and the Past brings together researchers in a wide array of disciplines including literary studies and history ethnography design film and sound studies who employ imagination creativity or fiction in their own historical scholarship or who analyze the use of imagination creativity or fiction to make historical claims by others This volume is organized into four topical sections related to representations of the past textual and conceptual approaches material and emotional approaches speculative and experiential approaches and embodied methodologies and covers a variety of temporal periods and geographical contexts Reflecting on the methodological theoretical and ethical underpinnings of writing history creatively or speculatively the essays situate themselves within current debates over epistemology and interdisciplinarity They yield new insights into historical research methods including archival investigations and source criticisms while offering readers tangible examples of how to do history differently *Handbook of Research on Creative Cities and Advanced Models for Knowledge-Based Urban Development* Galaby, Aly Abdel Razek,Abdrabo, Amal Adel,2020-10-09 Discussing global society entails discussing the predominant characteristics of knowledge based activities in all walks of life Its main characteristics are based on creativity innovation freedom and networking The emergence of such a society poses several challenges to all disciplines of social sciences Within such a context sociologists must have practical encounters to the theoretical methodological and empirical challenges imposed within contemporary global society In this vein studying creative cities from an interdisciplinary perspective helps provide critical readings of the phenomenon and the different levels of the concept in reality The Handbook of Research on Creative Cities and Advanced Models for Knowledge Based Urban Development provides global models and best practices of creative cities worldwide and illustrates different theoretical blueprints for the better understanding of contemporary global society While defining key concepts of creative cities global society and creative class the book also clarifies the main differences between hubs parks and precincts and their contributions to knowledge based development Covering topics that include knowledge economy social inclusion and urban mobility this comprehensive reference is ideal for sociologists urban planners designers political scientists economists anthropologists historians policymakers researchers academicians and students

[Exploring Perspectives on Creativity Theory and Research in Education](#) Daniel A. Tillman,2024-04-16 Collectively the sixteen chapters in this book investigate the power of creativity in the classroom many through the specific lens of limited resources as an opportunity The chapters are divided into two sections eight chapters comprising Section I Theory and Research and then the eight chapters comprising Section II Additional Perspectives and Future Directions Within these two

sections the more than two dozen authors that contributed to this book tackle a wide range of the possibilities for designing creative classroom based instruction wherein limited resources are highlighted and valued rather than avoided or lamented. The two main sections of this book are each preceded by a brief introductory summary highlighting those sections attributes and objectives with the intention of providing helpful structure to the reader but the book has also been designed such that each chapter stands independently and can be jumped to directly like a handbook. In its totality this book exploring perspectives on creativity theory and research in education is designed to serve as a valuable resource for teachers teacher educators school administrators parents and education researchers along with anyone else that is interested in optimizing our opportunities for nurturing creativity within classrooms.

Proceedings of the Annual Conference on Research, Educational Implementation, Social Studies and History (AREISSH 2021) Saefur Rochmat, Aman Aman, Zulkarnain Zulkarnain, Dyah Kumalasari, Danu Eko Agustinova, 2023-02-10. This is an open access book. The education sector during the Covid 19 Pandemic is currently undergoing a total reformation. The education process at schools and colleges which was carried out face to face has now turned into virtual face to face learning utilizing various platforms. Also the Covid 19 Pandemic has impacted the research and development process in the field which must be delayed due to the risk of Covid 19 transmission. In regard to this the educational process does not run optimally. In fact education is the process of developing the future generation of a country that are supposed to supported by all parties while looking for solutions to the problems at hand. As part of social sciences the objects of historical study include humans who are bound by the dimensions of space and time. This confirms that history is part of science that is tied to human life. Therefore various policies taken by the government must also be reviewed from the past historical experience with adjustments to the conditions of the era. Moreover historical experience will provide an idea that humans are always innovating to solve the problems they face especially policies related to education and learning. Based on those problems History Education Study Program of the Faculty of Social Sciences Universitas Negeri Yogyakarta will hold an international conference on Future Teaching and Learning A Disruptive Innovation. The aim of the conference is providing a forum for exchanging information and finding solutions to learning and teaching problems in the current era of disruption considering that the Covid 19 Pandemic has changed everything. This conference will seek solutions and innovations from various perspectives which include social historical and educational perspectives.
