Elected Versus Appointed Regulators Timothy Besley, Stephen Coate, 2000 This paper contrasts direct election with political appointment of regulators When regulators are appointed regulatory policy becomes bundled with other policy issues the appointing politicians are responsible for Since regulatory issues are not salient for most voters regulatory policy outcomes reflect the preferences of party elites and special interests Direct election of regulators strengthens the power of voters by ensuring the salience of regulatory issues Using panel data on regulatory outcomes from U S states we find evidence in favor of the idea that elected states are more pro consumer in their regulatory policies

Institutions and Sustainable Transport Piet Rietveld, Roger Stough, 2007 This unique book examines the role of institutions in transport regulation within a sustainability and comparative Trans Atlantic framework With contributions from leading experts in the field three areas of analysis are provided barriers to implementation of reforms regulatory issues and Public Private Partnerships PPP The discussion on barriers focuses on political and public acceptance as well as equity and environmental justice Regulatory reform analyses include comparative discussions of railroad and airline deregulation in North America and Europe which are complimented with analyses of EU integration and transport regulation for sustainability transport pricing and inter country competition Finally infrastructure finance and evaluation frameworks for PPP form the topical focus for a comprehensive assessment of PPP within the transport sector Scholars and advanced students in engineering public policy planning policy and international business will find *Institutions and Sustainable Transport* of great interest as will national and sub national transport senior planners and policy advisors in Europe and North America and analysts and strategic planners for logistics organizations *Policy and Politics*, 1995

Transmission Pricing and Stranded Costs in the Electric Power Industry William J. Baumol, J. Gregory Sidak, 1995 Stranded costs are those costs that electric utilities currently permitted to recover through their rates but whose recovery may be impeded or prevented by the advent of competition in the industry Estimates of those costs run from the tens to the hundreds of billions of dollars Should regulators permit utilities to recover stranded costs while they take steps to promote competition in the electric power industry William J Baumol and J Gregory Sidak argue that on both efficiency and equity grounds the answer to that question should be yes The authors show that a transmission price the price for sending electricity over the transmission grid can be determined in a manner that is compatible with economic efficiency and clearly neutral in its effects upon all competitors in electricity generation A correctly constructed regime of transmission pricing may in fact achieve the efficiency and equity goals that justify the recovery of stranded costs *The Quarterly Review of Economics and Finance*, 2000
