A Time For Risking Priorities For Women:

A Time for Risking Miriam Adeney, 2000-01-01 **Federal Register**, 1983-07-05 **Current Priorities in Health Research Agendas: Tensions Between Public and Commercial Interests in Prioritizing Biomedical, Social, and Environmental Aspects of Health** Matías Blaustein, Marc-Andre Gagnon, Mercedes Garcia Carrillo, 2024-05-09

Predominant health research agendas usually in line with existing financial incentives for obtaining lucrative research results tend to focus on therapeutic and pharmacological intervention prioritizing innovative therapies based on molecular biology and biotechnology approaches. However, commercial interests do not necessarily agree with existing public health priorities. The prevalence of health and biomedical research agendas often neglect not only the less lucrative diseases but also the study of the social and environmental determinants of health and disease even when addressing these aspects could significantly improve population health at much lower costs. Some examples of absent studies in the health research agendas are the analysis of non-medical factors influencing health outcomes, social determinants of health, the analysis of the relationship between people and their environment, environmental health, or the evaluation of the socio-environmental factors that influence the deterioration of bodies and territories such as the One Health approach.

Risk Governance Ortwin Renn, 2017-12-04. *Risk Governance* is a tour de force. Every risk manager, every risk analyst, every risk researcher must read this book. It is the demarcation point for all further advances in risk policy and risk research. Renn provides authoritative guidance on how to manage risks based on a definitive synthesis of the research literature. The skill with which he builds practical recommendations from solid science is unprecedented.

Thomas Dietz, Director, Environmental Science and Policy Program, Michigan State University, USA. A masterpiece of new knowledge and wisdom with illustrative examples of tested applications to real-world cases. The book is recommendable also to interested students in different disciplines as a timely textbook on risk beyond risk.

Norio Okada, Full Professor and Director at the Disaster Prevention Research Institute (DPRI), Kyoto University, Japan. There are classic environmental works such as *The Tragedy of the Commons* by Hardin, *Risk Society* by Beck, *The Theory of Communicative Action* by Habermas, and the seminal volumes by Ostrom on governing the commons. Renn's book fits right into this series of important milestones of environmental studies.

Jochen Jaeger, Professor at Concordia University, Montreal, Canada. *Risk Governance* provides a valuable survey of the whole field of risk and demonstrates how scientific, economic, political, and civil society actors can participate in inclusive risk governance.

Jobst Conrad, Senior Scientist, Social Science Research Center, Berlin, Germany. Renn offers a remarkably fair-minded and systematic approach to bringing together the diverse fields that have something to say about risk. *Risk Governance* moves us along the path from the noisy formative stage of thinking about risk to one with a stronger empirical, theoretical, and analytical foundation.

Baruch Fischhoff, PhD, Howard Heinz University Professor, Carnegie Mellon University, Pittsburgh, USA. I cannot describe how impressed I am at the breadth and coherence of Renn's career's work. Written with remarkable clarity and minimal technical jargon, this should

be required reading in risk courses John Graham former director of the Harvard Risk Center and former deputy director of the Office of Budget and Management of the United States Administration This book for the first time brings together and updates the groundbreaking work of renowned risk theorist and researcher Ortwin Renn integrating the major disciplinary concepts of risk in the social engineering and natural sciences The book opens with the context of risk handling before flowing through the core topics of assessment evaluation perception management and communication culminating in a look at the transition from risk management to risk governance and a glimpse at a new understanding of risk in post modern societies
