African Design:

Decolonising Design in Africa Yaw Ofosu-Asare, 2024-09-30 Decolonising Design in Africa offers a groundbreaking exploration of design education in Africa through a decolonial lens. By examining the colonial legacies that have shaped design education in Africa, it foregrounds the problematic ways that current pedagogical approaches primarily reflect western values and priorities. This book advocates for integrating Indigenous knowledge, cultural practices, and philosophies into contemporary African design education. It spans a wide geographical and temporal range from historical analyses of colonial influences to envisioning decolonised African design futures. It delves into diverse aspects including spirituality in design, cultural symbolism, sustainable practices, and the ethical dimensions of decolonising design. Pioneering in its interdisciplinary approach, the book weaves together theoretical discussions, methodological innovations like storytelling and practical strategies for curriculum reform. It presents inspiring case studies of designers and educators who are actively decolonising their practices. *Decolonising Design in Africa* is a vital resource for design educators, students, practitioners, and policymakers, not just in Africa but worldwide. It makes a compelling case for reimagining design education in a more inclusive, contextually relevant, and socially conscious way. The book's ultimate aim is to cultivate a new generation of designers equipped to address the complex challenges of a decolonising world.

Designing Worlds Kjetil Fallan, Grace Lees-Maffei, 2016-06 From consumer products to architecture to advertising to digital technology, design is an undeniably global phenomenon. Yet despite their professed transnational perspective, historical studies of design have all too often succumbed to a bias toward Western industrialized nations. This diverse but rigorously curated collection recalibrates our understanding of design history, reassessing regional and national cultures while situating them within an international context. Here, contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic, all the while sensitive to the complexities of local variation and the role of nation states in identity construction.

Critical Terms for the Study of Africa Gaurav Desai, Adeline Masquelier, 2018-12-07 For far too long the Western world viewed Africa as unmappable terrain, a repository for outsiders' wildest imaginings. This problematic notion has had lingering effects, not only on popular impressions of the region but also on the development of the academic study of Africa. *Critical Terms for the Study of Africa* considers the legacies that have shaped our understanding of the continent and its place within
