## **African Economic Development:**

**African Economic Development** Christopher Cramer, John Sender, Arkebe Oqubay, 2020-06-10 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Unevenness and inequalities form a central fact of African economic experiences. This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries using the striking variation in economic performance as a starting point. *African Economic Development: Evidence, Theory and Policy* highlights not only difference between countries but also variation within countries. It focuses on issues relating to gender, class and ethnic identity such as neonatal mortality, school dropout and horticultural and agribusiness exports. Variations in these areas point to opportunities for changing performance, reducing inequalities, learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past. *African Economic Development* rejects teleological illusions and Eurocentric prejudice, criticizing a range of orthodox and heterodox economists for their cavalier attitude to evidence. Instead, it shows that seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be if certain impediments were removed. Drawing on decades of research and policy experience, this book combines careful use of available evidence from a range of African countries with economic insights to make the policy case for specific types of public sector investment.

*African Economic Development* Emmanuel Nnadozie, Afeikhena Jerome, 2019-05-08 In a sweeping survey of African economies, leading scholars offer the latest research into the biggest current influences on African growth and development, taking account of relevant institutional contexts as well as significant or unique problems that have slowed Africa's progress.

**African Economic Development** Steven Langdon, Archibald R.M. Ritter, Yiagadeesen Samy, 2018-03-05 Sub-Saharan Africa is at a turning point. The barriers to economic growth seen in the 1980-2000 era are disappearing and new optimism is spreading. However, difficult goals of eliminating poverty, achieving equity and overcoming environmental threats continue. This much-needed and insightful textbook has been written to help us understand this combination of emerging improvements and significant challenges. Opening with an analysis of the main theories relating to development in Sub-Saharan Africa, the book explores all the key issues including Human development, Rapid urbanization, Structural and gender dimensions, Sustainable development and environmental issues, and Africa's role in the world economy. The authors use economic tools and concepts throughout in a way that makes them accessible to students without an economics background. Readers are also aided by a wide range of case studies on the ground, examples and statistical information which provide a detailed analysis of each topic. This text is also accompanied by an e-resource featuring additional sources for students and instructors. *African Economic Development* is a clear and comprehensive textbook suitable for courses on African economic
