African Winter:

The Birds of Africa: Volume IV, 2020-06-25 This is the fourth volume in the Birds of Africa series covering the rich avifauna of the world's second largest continent. Volume IV covers the first 12 families of the passerines. Universally recognised as by far the most authoritative work ever published on the subject, *The Birds of Africa* is a superb multi-contributor reference work with encyclopaedic species texts, stunning paintings of all species and numerous subspecies, hundreds of informative line drawings, detailed range maps and extensive bibliographies. Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology, including the evolution and biogeography of African birds. Diagnoses of the families and genera, often with superspecies maps, are followed by the comprehensive species accounts themselves. These include descriptions of range and status, field characters, voice, general habits, food and breeding habits. Full bibliographies, acoustic references and indexes complete this scholarly work of reference. This fourth volume in the series deals comprehensively with broadbills, pittas, larks, swallows and martins, wagtails, pipits and longclaws, cuckoo shrikes, bulbuls, waxwings, dippers, wrens, accentors and chats. The editors and artists have worked closely with other authors, all acknowledged experts in their field, to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves.
