Messina, 2010-06-25 School activities alone are not always sufficient to ensure children's academic progress or socio emotional development and well being And the time when many children typically have the least adult supervision immediately after school is also the time that they are at the highest risk to act as perpetrators or become victims of antisocial behavior Throughout A Blueprint for Promoting Academic and Social Competence in After School Programs which focuses on children in grades 1 through 6 noted experts identify the best practices of effective programs and pinpoint methods for enhancing school based skills and making them portable to home and neighborhood settings This volume 1 Analyzes the concepts central to effective after school programs 2 Offers developmental cognitive and social ecology perspectives on how children learn 3 Features more than 100 exercises that develop young people's capabilities for academic social moral and emotional learning These exercises are ready to use or can be adapted to students unique needs 4 Emphasizes young people's development as students and as productive members of society during middle to late childhood and early adolescence 5 Presents explicit theory and evidence that can be used to explain the value of after school programs for budget proposals This important book will find an appreciative ready audience among the program directors who design
