John Dewey

After Nature Modern Library Paperback:

After Nature W.G. Sebald, 2011-12-07 After Nature W G Sebald's first literary work now translated into English by Michael Hamburger explores the lives of three men connected by their restless questioning of humankind's place in the natural world. From the efforts of each an order arises in places beautiful and comforting though more cruel too than the previous state of ignorance. The first figure is the great German Renaissance painter Matthias Grünewald. The second is the Enlightenment botanist explorer Georg Steller who accompanied Bering to the Arctic. The third is the author himself who describes his wanderings among landscapes scarred by the wrecked certainties of previous ages. After Nature introduces many of the themes that W G Sebald explored in his subsequent books. A haunting vision of the waxing and waning tides of birth and devastation that lie behind and before us, it confirms the author's position as one of the most profound and original writers of our time.

The Middle Works of John Dewey, Volume 14, 1899 - 1924 John Dewey, 2008. Volume 14 of The Middle Works of John Dewey 1899-1924 series provides an authoritative edition of Dewey's Human Nature and Conduct. A Modern Language Association Committee on Scholarly Editions textual edition. Human Nature and Conduct evolved from the West Memorial Foundation lectures at Stanford University. The lectures were extensively rewritten and expanded into one of Dewey's best known works. As Murray G. Murphey says in his Introduction: "It was a work in which Dewey sought to make explicit the social character of his psychology and philosophy, something which had long been evident but never so clearly spelled out." Subtitled An Introduction to Social Psychology, Human Nature and Conduct sets forth Dewey's view that habits are social functions and that social phenomena such as habit and custom and scientific methods of inquiry are moral and natural. Dewey concludes: "Within the flickering inconsequential acts of separate selves dwells a sense of the whole which claims and dignifies them. In its presence we put off mortality and live in the universal."

Libraries and Learning Resource Centres Bidy Fisher, 2013-06-17. This comprehensive reference examines the changing role and design of library buildings using a critical examination of recent examples from around the world. The authors who represent the views of the architect and the client outline the history and changing typology of the library. They examine the new national public academic and specialist libraries using numerous international examples including Sri Lanka, Vancouver, Johannesburg, Paris and London. New design advice and technical data is presented to illustrate the many approaches that designers have taken in creating a building with many diverse functions. The book concludes with speculations about the future of the library as a place for storing, reflecting upon and exchanging knowledge. Libraries are undergoing fundamental change as new technology liberates the library from its dependence upon the written word. Increasingly, libraries are seen as learning resource centres with a smooth interface between computer-based access and traditional book and journal material.

Ending the War Between Humanity and Nature Patrick C. Lee, 2020-08-19. This book offers plausible explanations for people's puzzling unwillingness to address the human-nature interactions that have led us to the precipice that is climate change today.

Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling ourselves for centuries about humanity's place in or out of the natural world
