Aftershocks Code Red:

Aftershocks Nancy Warren,2009-09-01 Earthquake aftershocks trap Mayor Patrick O Shea and his assistant Briana Bliss in an elevator But emergency services are stretched to the limit with 911 calls The mayor and Briana wait And passions flare Briana Bliss planned to use her job as Mayor Patrick O Shea s assistant to get back at him for allegedly destroying her uncle s political chances But she s unprepared for the way Patrick makes her feel And in the close confines of the stalled elevator Patrick and Briana give in to the attraction that s been sizzling between them for months Now how will Briana ever prove to Patrick that she acted out of love and not revenge [Earthquake in Haiti](#) Miriam Aronin,2010-08-01 Describes the devastating earthquake that occurred in Haiti on January 12 2010 **Hack in a Flak Jacket** Peter Stefanovic,2016-08-09 A startlingly honest account of experiencing war and terrorism from the frontline by Peter Stefanovic one of Australia s leading journalists and foreign correspondents Flak jackets are dreadful things Sure they have a purpose and if one ever stopped a bullet or piece of shrapnel from spearing into my vital organs I would kiss it hang it up and frame it But that hasn t happened yet For almost ten years Peter Stefanovic was Channel Nine s foreign correspondent in Europe the US Africa and the Middle East During that time he witnessed more than his fair share of death and destruction and carried the burden of those images all while putting his own personal safety very much in the firing line From flak jackets to tuxedos From the funerals of world leaders and icons to war zones and natural disasters This is a thrilling account of a life lived on camera delivering the news wherever it happens whatever the risk *Open-file Report* , **Performance-Based Seismic Engineering: Vision for an Earthquake Resilient Society** Matej Fischinger,2014-07-15 The Bled workshops have traditionally produced reference documents providing visions for the future development of earthquake engineering as foreseen by leading researchers in the field The participants of the 2011 workshop built on the tradition of these events initiated by Professors Fajfar and Krawinkler to honor their important research contributions and have now produced a book providing answers to crucial questions in today s earthquake engineering What visible changes in the design practice have been brought about by performance based seismic engineering What are the critical needs for future advances What actions should be taken to respond to those needs The key answer is that research interests should go beyond the narrow technical aspects and that the seismic resilience of society as a whole should become an essential part of the planning and design process The book aims to provide essential guidelines for researchers professionals and students in the field of earthquake engineering It will also be of particular interest for all those working at insurance companies governmental civil protection and emergency management agencies that are responsible for assessing and planning community resilience The introductory chapter of the book is based on the keynote presentation given at the workshop by the late Professor Helmut Krawinkler As such the book includes Helmut s last and priceless address to the engineering community together with his vision and advice for the future development of performance based design earthquake engineering and seismic risk management [From Preparation to](#)
