Against Management Organization In The Age Of Managerialism:

Against Management Martin Parker, 2002-10-25 *Against Management* argues that management is increasingly being seen as a problem and not a solution Martin Parker argues that managing is not the only way to organize and that managerialism is a global form of ideology which is being used to justify considerable cruelty and inequality He also suggests that in a variety of places an odd collection of people seem to be coming to similar conclusions It is possible to identify cracks in the religion of managerialism as some of its converts begin to lapse and others intensify their protest In order to illustrate his argument Parker draws from a wide variety of sources anti corporate activism books and films which use management as their backdrop the movement for business ethics and corporate social responsibility as well as critical management studies and general social theories of the present Parker s overall argument is that we can see the beginnings of a cultural shift in the image of management and that this is a significant historical change Perhaps most importantly it opens up the possibility of exploring non managerial alternatives to contemporary assumptions about organizing *Against Management* deliberately attempts to blur the boundaries between academic and popular writing and encourages some radical questioning of the common sense that tells us that we need management managers and management schools This will be essential reading for second year undergraduates and above in business and management studies including MBA sociology and cultural studies

Ecclesial Leadership as Friendship Chloe Lynch, 2019-03-01 When it comes to talking about the activity of directing the church the language of leadership and leaders is increasingly popular Yet what is leadership and how might theological narratives better resource the discourse and practice of leadership in ecclesial contexts In identifying and critiquing managerialism as a dominant narrative of leadership in the Western church this book calls for an alternative approach founded on the concept of friendship Engaging with the wider field of leadership studies the book establishes an understanding of leadership activity and brings it into conversation with an incarnational ecclesiology The result is a prophetic reimagining of ecclesial leadership in terms of a relational kenotic praxis This praxis of mutuality and love is framed here in the rich language of Christian friendship The book also wrestles deeply with the embodiment of such a praxis making explicit the power behaviours typical of friendship leadership and offering constructive guidance for practitioners in the task of implementation within a complex and fractured world This book offers a new vision of the centrality of friendship to leadership of a healthy church community As such it will be of great use to scholars of practical theology ecclesiology and leadership as well as practitioners in church ministry

Being the Body of Christ in the Age of Management The Rev'd Lyndon Shakespeare, 2016-08-26 The church needs effective leaders We must be more missional Better organization is required Such sentiments are commonplace among Christians concerned with the health and sustainability of their local church as well as the church universal Over the past thirty years the desire for more efficiently run effectively led and organizationally sound churches has contributed to an approach to thinking about the church in terms uncritically assumed

from the business and management sector This has given rise to treating the church as if it were just another social body in need of better organization The question is what happens when we apply the logic of management techniques to an organization that identifies as the body of Christ Drawing on organizational theory theological anthropology and sacramental theology this book navigates a path for Christians that avoids reducing the church to just another organization while providing a vision for the church as the social body where all are invited to connect and be made members of Christ and each other Such a vision provides an alternative to the social categorization that would define the church by its organizational character rather than its eschatological destiny

Managing Nongovernmental Organizations Frederik Claeyé, 2014-03-26 The idea that international development aid needs to be better managed and coordinated gained currency in the early 1990s The increasing emphasis on management has resulted in the present vogue of managing for development results as one of the central tenets in the discourse on international aid But how appropriate are these ideas tools and techniques for non governmental development organizations NGOs and how much does geographic context matter Examining the current debate on aid effectiveness and the role of NGOs in contributing to it this book highlights the critical importance of understanding how the global and the local interact to increase aid efficacy and develop more culturally astute ways of managing NGOs With a focus on NGOs active in sub Saharan Africa as case studies author Frederik Claey demonstrates that NGOs are not mere passive recipients of management knowledge and practices emanating from the global governance structure of international aid but actively engage with these ideas and practices to translate and rework them through a local cultural lens This process results in the emergence of unique hybrid management systems that combine the pressure to become more business like with the mission to satisfy the demands of the communities they serve
