Art in the Age of Technoscience Ingeborg Reichle, 2009-08-21 Art the Life Sciences and the Humanities In Search of a Relationship Robert Ztuijnenberg Over the last decades there has been a distinctive effort in the arts to engage with science through participation in the actual practice of science Exchange projects between artists and scientists such as artist in lab projects have become common and a large number of organizations have emerged that stimulate and initiate collaboration between artists and scientists Research funding organizations in the humanities such as the British Arts and Humanities Research Council AHRC and the Netherlands Organisation for Scientific Research NWO have also initiated all sorts of research programs that explore and support interactions between art and science As a result artists have grown more involved with scientific concerns and practices and their increased interactions with scientists have also become a subject of study within the humanities Why do artists openly seek to gain access to the domain of the sciences And why do scholars in the humanities value collaboration between artists and scientists so much that they are willing to spend research time and money on it This interest in science I argue in this preface for Ingeborg Reichle's book Art in the Age of Technoscience underscores that the arts and the humanities are searching to establish a new relationship with the natural sciences as well as with each other Art and Science The relationship between the arts and the sciences has been subject to permanent change over the past two centuries
