Crude Awakenings , Lives Per Gallon Terry Tamminen,2012-09-26 How much would you pay for a gallon of gas 4 00 10 00 Would you pay with the health of your lungs or with years taken from your lifespan The infamous pain at the pump runs much deeper than our wallets argues Terry Tamminen former Secretary of the California Environmental Protection Agency and current Special Advisor to California Governor Arnold Schwarzenegger Petroleum may power our cars and heat our homes but it also contributes to birth defects and disorders like asthma and emphysema not to mention cancer In *Lives Per Gallon* Tamminen takes a hard look at these and other health environmental and national security costs hidden in every barrel of oil While the petroleum industry is raking in huge profits Tamminen shows it is studiously avoiding measures that would lessen the hazards of its products Using the successful lawsuits by state governments against big tobacco as a model the author sets forth a bold strategy to hold oil and auto companies accountable and force industry reform He also offers a blueprint for developing alternative energy sources based on California s real world experiences Certain to be controversial *Lives Per Gallon* is an unblinking assessment of the true price of petroleum and a prescription for change The choice is clear continuing paying with our health or kick our addiction and evolve beyond an oil dependent economy Catastrophic Consequences Steven R. David,2008-08-15 Introduction a new kind of threat Saudi Arabia oil fields ablaze Pakistan loose nukes Mexico a flood of refugees China collapse of a great power Conclusions the coming storm **Crude Awakenings** ,2004 *Crude Awakening* Jack Doyle,1994 *Crude Awakening* Christine Holly,2020-12-10 Christine Holly is a small town girl from Maryland s Eastern Shore raised in a conservative home in a family deeply affected by the death of her sister at a young age She meets and falls in love with a younger man an Oklahoma farm boy whose prominent family owns substantial land and oil wells She marries CJ her Prince Farming and moves to the Plains to become a devoted farm wife Her fantasies of an all American agrarian life soon become nightmares when she discovers her new relatives are not the wholesome crowd she perceived She finds herself thrust into a twisted drama of dysfunction aberration and shocking revelations that make her question her future and her own sanity In *Crude Awakening* Holly narrates a fictionalized account of her experiences as she s extracted from her staid and stable environs and moves into a crazy and chaotic environment with her new family She tells of mustering the courage to leave her marriage and her dreams behind **Forum** ,1917 *Myths of the Oil Boom* Steve A. Yetiv,2015-03-18 The last decade has seen a far reaching revolution in the oil industry both in the US and globally By some measures America is on pace to become the world s biggest oil producer an outcome that was inconceivable just a few years ago But what does this shift really mean for American and global security In *Myths of the Oil Boom* Steve A Yetiv an award winning expert on the geopolitics of oil takes stock of our new era of heightened petroleum production and sets out to demolish both the old myths and misconceptions about oil and the new ones that are quickly proliferating As he explains increased production in the US will not lead to a major reduction in longer term oil prices even if it has contributed to their

precipitous fall in the short run America will not intervene less in the Persian Gulf just because it is producing more oil domestically Saudi Arabia is less willing or able to play global gas pump to the world economy than in the past Building an electric car industry does not mean that consumers will buy in but neither is it true that a broad shift toward eco friendly cars will have very little impact on greenhouse gas emissions Most importantly raising the level of domestic production will never solve America s energy and strategic problems and it may in fact worsen climate change unless it is accompanied by a serious national and global strategy to decrease oil consumption While Yetiv takes on these and a number of other misconceptions in this panoramic account this is not just an exercise in myth busting it s also a comprehensive overview of the global geopolitics of oil and America s energy future cross cutting some of the biggest economic and security issues in world affairs Accessibly written and sharply argued *Myths of the Oil Boom* will reframe our understanding of the most politicized commodity in the world **Lucia** Amanda Minnie Douglas,1872 **Ecology Documentaries** Susan

Hayward,2021-11-29 This companion piece to Susan Hayward s *Film Ecology* focuses on ecology documentaries produced in the first 20 years of the new millennium 2000-19 Using Kate Raworth s regenerative economic theoretical model as set out in *Doughnut Economics* this book examines 57 films emanating from Europe and the 4 areas of concern they raise about energy production pollution and waste management agribusiness disrupted ecosystems and the migratory flow These ecology documentaries make explicit the damage done to our planet thanks to growth capitalism and neoliberal globalisation But they also provide the evidence that solutions to this planetary abuse exist The book demonstrates how these documentaries reveal the process of humankind s planetary plundering and explores the structuring of the eco doc as a new generic type in the domain of documentary practice Using Raworth s model allows us to measure the tentacular extent of the planetary harm growth economics induces and too by way of contrast perceive how regenerative economics can work to redress this harm heal the Earth and make it a safe place for humanity This book is ideal for film studies scholars and students including those teaching or studying film practice documentary film European cinema and environmental studies as well as economists interested in regenerative economic models It also has general appeal to all who are concerned about some of the major causes of planetary degradation and its impact on humanity and Earth *Forum* Loretta Sutton Metcalf,Walter Hines Page,Joseph Mayer Rice,Frederic Taber Cooper,Arthur Hooley,George Henry Payne,Henry Goddard Leach,D.
