**Metal and Flesh** Ollivier Dyens, 2001-10-12 A poetic exploration of the new world created by the collision of the biological body with technology and culture For more than 3 000 years humans have explored uncharted geographic and spiritual realms Present day explorers face new territories born from the coupling of living tissue and metal strange lifeforms that are intelligent but unconscious neither completely alive nor dead Our bodies are now made of machines images and information We are becoming cultural bodies in a world inhabited by cyborgs clones genetically modified animals and innumerable species of human information symbionts Ollivier Dyens's Metal and Flesh is about two closely related phenomena the technologically induced transformation of our perceptions of the world and the emergence of a cultural biology Culture according to Dyens is taking control of the biosphere Focusing on the twentieth century which will be remembered as the century in which the living body was blurred molded and transformed by technology and culture Dyens ruminates on the undeniable and irreversible human machine entanglement that is changing the very nature of our lives

The Time of Cruel Miracles Roman Katsman, 2002 On the basis of Dostoevsky and Agnon this book analyzes the problem of literary mythopoesis Guided by a personalistic dialogical conception of myth the author elaborates a theory of literary mythopoesis and develops a method of studying mythopoetic processes on different levels of meaning in a work of literature As a result mythopoesis is revealed as one of the fundamental mechanisms of producing a complex of structures while mythopoetic criticism functions as a dialogue between different cultures thus documenting the relationship between ethics and aesthetics in literature Contents Myth and Dialogue Mythopoesis as Revelation Mythopoesis as Ethics and Aesthetics Mythopoesis as Narrative Intercultural Ethics Mythopoesis as Journey Mythopoesis as Scandal

*Singing Soviet Stagnation: Vocal Cycles from the USSR, 1964-1985* Richard Louis Gillies, 2021-12-09 Singing Soviet Stagnation Vocal Cycles from the USSR 1964 1985 explores the ways in which the aftershock of an apparent crisis in Soviet identity after the death of Stalin in 1953 can be detected in selected musical literary works of what has become known as the Stagnation era 1964 1985 Richard Louis Gillies traces the cultural impact of this shift through the intersection between music poetry and identity presenting close readings of three

substantial musical literary works by three of the period's most prominent composers of songs and vocal cycles: Seven Poems of Aleksandr Blok Op 127 (1966-1967) by Dmitri Shostakovich (1906-1975), Russia; Cast Adrift (1977) by Georgy Sviridov (1915-1998); Stupeni (1981-1982-1997) by Valentin Silvestrov (b. 1937). The study elaborates an interdisciplinary approach to the analysis of musical-literary artworks that does not rely on existing models of musical analysis or on established modes of literary criticism, thereby avoiding privileging one discipline over the other. It will be of particular significance for scholars, students, and performers with an interest in Russian and Soviet music, the intersection between music and poetry, and the history of Russian and East European culture, politics, and identity during the twentieth century.

**Spin Control** Chris Moriarty, 2007-06-26. In this stunning follow-up to the critically acclaimed novel *Spin State*, Chris Moriarty depicts a grim future in which the final frontier may well be extinction. For as far-flung planets are terraformed and Earth's age-old conflicts are contracted out to AIs, humanity is losing the only war that counts: the war for survival. Call Arkady a clone with a conscience. Or call him a traitor. A member of the space-faring Syndicates, Arkady has defected to Israel with a hot commodity: a genetic weapon powerful enough to wipe out humanity. But Israel's not buying it. They're selling it, and Arkady to the highest bidder. As the auction heats up, the Artificial Life Emancipation Front sends in Major Catherine Li. Already drummed out of the Peacekeepers for war crimes, Li has now literally hooked up with an AI who has lived many lifetimes and shunted through many bodies. And while they each have their own definition of victory, together they have only one chance at survival.

Outrage Machine Tobias Rose-Stockwell, 2023-07-11. Amazon's Best History Book of the Month for July 2023. An invaluable guide to understanding how the internet has broken our brains and what we can do to fix it. The original internet was not designed to make us upset, distracted, confused, and outraged. But something unexpected happened at the turn of the last decade when a handful of small features were quietly launched at social media companies with little fanfare. Together they triggered a cascading set of dramatic changes to how media, politics, and society itself operate, inadvertently creating an Outrage Machine we cannot ignore. Author, designer, and media researcher Tobias Rose-Stockwell shares the defining shifts caused by these technologies and how they have ignited a society-wide crisis of trust. Drawing from cutting-edge research and vivid personal anecdotes, Rose-Stockwell illustrates how social media has bound us to an unprecedented system of public performance, training us to react rather than reflect and attack rather than debate. *Outrage Machine* reveals the triggers and tactics used to exploit our anger, unpacking how these tools hack our deep tribal instincts and psychological vulnerabilities and how they have become opportunistic platforms for authoritarians and a threat to democratic norms everywhere. But this book is not just about the problem. In a story spanning continents and generations, Rose-Stockwell explores how every new media technology disrupts our ability to make sense of the world, from the printing press to the telegraph, from radio to television. *Outrage Machine* situates social media within a historical cycle of confusion, violence, and emerging tolerance. Using clear language and powerful illustrations, this book reveals the magnitude of the challenges we face while offering
